Robinson, 2024-09-10 Aimed at students and professionals this book provides an overview of the science and technology of the downstream sector of the oil and gas industry Topics include the refining of crude oil and other feedstocks including renewables into fuels and lubricants They also describe the conversion of simple chemicals into solvents polymers fibers rubbers coatings and myriad other products including pharmaceuticals In addition to drawing on the authors previous books it includes teaching material from several courses These include workshops provided for top refining companies and a highly rated course taught at the Florida A M University Florida State University USA Saudi Arabia 1975 - 2020 Anthony Axon, Susan Hewitt, 2022-03-16 The fifth in the CAIW series this title reflects 50 years of experience of Cambridge UK based World of Information which since 1975 has followed the region s politics and economics In the period following the Second World War Saudi Arabia a curious fusion of medieval theocracy unruly dictatorship and extrovert wealth has been called a country of superlatives The modernisation of the Kingdom s oil industry has been a smooth process its oilfields are highly sophisticated However social modernisation has not kept pace Reform long a preoccupation among the Peninsula s leaders does not necessarily go hand in hand with religion **Optimizing Cyberdeterrence** Robert Mandel, 2017-03-01 Cyberattacks are one of the greatest fears for governments and the private sector The attacks come without warning and can be extremely costly and embarrassing Robert Mandel offers a unique and comprehensive strategic vision for how governments in partnership with the private sector can deter cyberattacks from both nonstate and state actors Cyberdeterrence must be different from conventional military or nuclear deterrence which are mainly based on dissuading an attack by forcing the aggressor to face unacceptable costs In the cyber realm where attributing a specific attack to a specific actor is extremely difficult conventional deterrence principles are not enough Mandel argues that cyberdeterrence must alter a potential attacker s decision calculus by not only raising costs for the attacker but also by limiting the prospects for gain Cyberdeterrence must also involve indirect unorthodox restraints such as exposure to negative blowback and deceptive diversionary measures and cross domain measures rather than just retaliation in kind The book includes twelve twenty first century cyberattack case studies to draw insights into cyberdeterrence and determine the conditions under which it works most effectively Mandel concludes by making recommendations for implementing cyberdeterrence and integrating it into broader national security policy Cyber policy practitioners and scholars will gain valuable and current knowledge from this excellent study The Geopolitical Economy of Sport Simon Chadwick, Paul Widdop, Michael M. Goldman, 2023-06-06 This is the first book to define and explore the geopolitical economy of sport the intersection of power politics money and state interests that both exploit and shape elite sport around the world Russia s invasion of Ukraine the global response and the consequent ramifications for sport have
