Architecture And Critical Imagination:

Architecture and Critical Imagination Wayne Attoe, 1978 **Architecture Beyond Criticism** Wolfgang F. E. Preiser, Aaron T. Davis, Ashraf M. Salama, Andrea Hardy, 2014-11-27 For the first time this book demonstrates that the two paradigms of architectural criticism and performance evaluation can not only co exist but complement each other in the assessment of built works As architecture takes more principled stances worldwide from environmental sustainability to social cultural and economic activism this book examines the roles of perceived and measured quality in architecture By exploring in tandem both subjective traditional architectural criticism and environmental design and performance evaluation and its objective evaluation criteria the book argues that both methodologies and outcomes can achieve a comprehensive assessment of quality in architecture Curated by a global editorial team the book includes Contributions from international architects and critics based in the UK USA Brazil France Qatar Egypt New Zealand China Japan and Germany Global case studies which illustrate both perspectives addressed by the book and comparative analyses of the findings A six part organization which includes introductions and conclusions from the editors to help guide the reader and further illuminate the contributions By presenting a systematic approach to assessing building performance design professionals will learn how to improve building design and performance with major stakeholders in mind especially end users occupants

on Cities in Southeast Asia Tim Bunnell, Lisa Drummond, Ho, 2021-11-15 *Critical Reflections* draws together the multi disciplinary research of scholars working in on cities across Southeast Asia The fourteen essays collected in the volume are organised into three thematic sections re conceptualisation competition and intervention Collectively these reflections contribute to and interrogate the expanding urban and regional studies literature The volume constitutes a critical corrective to the existing literature which all too often seeks to diagnose contemporary urban trends everywhere from a small number of mostly Western paradigmatic cases Yet while acknowledging the increasing interconnectedness and shared global orientation of most cities in Southeast Asia the volume is wary of positing an equally generalising regional model Individually these essays attend to the diversity of contemporary urban experiences in Southeast Asia Companion to Contemporary Architectural Thought Ben Farmer, Dr Hentie J Louw, Hentie Louw, Adrian Napper, 2003-09-02 Architecture has attracted increasing worldwide attention in recent years not only because of its cultural significance but also because of concern over
