Architecture Without Rules David Masello, 1993 *Architecture Without Rules* David Masello, 1993 An armchair tour through twenty strikingly innovative houses Breuer's Bohemia James Crump, 2021-09-14 Breuer's Bohemia explores a vibrant period of midcentury modern design and culture as seen through the influential New England houses designed by Marcel Breuer for his circle of clients and friends The iconic twentieth century architect Marcel Breuer was a prolific designer of residential architecture which is often overshadowed by his early renown as a Bauhaus furniture maker and his large scale projects Breuer's Bohemia surveys the houses he designed in Connecticut and Massachusetts from the 1950s through the 70s many of which were commissioned by a few culturally progressive clients chiefly Rufus and Leslie Stillman and Andrew and Jamie Gagarin who coalesced around him into a dynamic social circle Included in this scene were prominent cultural figures such as Alexander Calder Arthur Miller Francine du Plessix Gray Philip Roth and William Styron and more marking a unique intersection of postwar architecture art and letters The publication of Breuer's Bohemia coincides with the feature length documentary of the same name by author and filmmaker James Crump exploring Breuer's explosive residential practice on the East Coast Through original research and interviews the voices of principal characters from Breuer's circle and notable figures from the field of architecture help tell the story of Breuer's collaborations with his friends and clients breathing new life into the history of the rich cultural atmosphere of which they all played a vital part Heavily illustrated with vintage and contemporary photographs as well as rarely seen archival materials Breuer's Bohemia is a unique glimpse of a twentieth century milieu that produced an aesthetic intellectual and sometimes sybaritic community during a fertile period of American design and culture *Residential Spaces of the World 2* Images Publishing, Images(Ed), 1994 A showcase of contemporary and inspirational trends in residential interiors illustrating living spaces leisure spaces dining spaces kitchens bathrooms bedrooms courtyards and design details Almanac of Architecture & Design, 2005 James P. Marcel Breuer John Poros, 2022-09-09 This book tracks the development of Marcel Breuer's aesthetic clash between uniformity and singularity through the detailed examination of his seminal buildings Each chapter examines a specific building and puts into context Breuer's other work and the contemporary movements architects of the post war era such as Surrealism Brutalism and structural expressionism The buildings examined include the UNESCO Headquarters in Paris France of 1958 the IBM Research Center in Le Gaude France of 1962 the Annunciation Priory in Bismark North Dakota of 1963 and the Atlanta Central Library of 1980 Marcel Breuer's approach to design was inspired by the Spanish phrase sol y sombra sun and shadow Sun and shadow meant for Breuer that a juxtaposition of contrasts was necessary light glass walls and heavy concrete masses lifted over voids and serial precast construction resting on sculptural columns became hallmarks of Breuer's buildings By creating an architecture of juxtaposition Breuer's work can be interpreted as a surrealist recontre as fueling a new architectural condition A critical evaluation of Marcel Breuer's work this book is written for graduate students

researchers and academics interested in his work and how it shaped the architecture of the post war era **Saint John's Abbey Church** Victoria M. Young,2014-10-01 In the 1950s the brethren at the Benedictine Abbey of Saint John the Baptist in Collegeville Minnesota the largest Benedictine abbey in the world decided to expand their campus including building a new church From a who s who of architectural stars such as Walter Gropius Richard Neutra Pietro Belluschi Barry Byrne and Eero Saarinen the Benedictines chose a former member of the Bauhaus Marcel Breuer In collaboration with the monks this untested religious designer produced a work of modern sculptural concrete architecture that reenvisioned what a church could be and set a worldwide standard for midcentury religious design Saint John s Abbey Church documents the dialogue of the design process as Breuer instructed the monks about architecture and they in turn guided him and his associates in the construction of a sacred space in the crucial years of liturgical reform A reading of letters drawings and other archival materials shows how these conversations gave shape to design elements from the church s floor plan to the liturgical furnishings art and incomparable stained glass installed within it The book offers a rare detailed view of how a patron and architect work together in a successful building campaign one that in this case lasted for two decades and resulted in designs for twelve buildings ten of which were completed The post World War II years were critical in the development of religious and architectural experiences in the United States experiences that came together in the construction of Saint John s Abbey and University Church and that find their full expression in Victoria M Young s account of the process Using the liturgy of the mid twentieth century as a cornerstone for understanding the architecture produced to support it her book showcases the importance of modernism in the design of sacred space and of Marcel Breuer s role in setting the standard *Architecture, Technology and Process* Chris Abel,2007-03-30 This new selection of essays follows Chris Abel s previous best selling collection *Architecture and Identity* Drawing upon a wide range of knowledge and disciplines the author argues that underlying technological changes in the process of architectural production are fundamental changes in the way we think about machines and the world we live in Key topics include new patterns of urbanism in the fast growing cities of asia pacific metaphorical extensions of mind and body in cyberspace the divergent European and North American values shaping Sir Norman Foster s and Frank Gehry s work and the collaborative work methods and technologies creating the adaptable design practices of today *The Details of Modern Architecture* Edward R. Ford,1990 Covering the period 1890 1932 this book focuses on various recognised masters explaining the detailing and construction techniques used in their buildings
