Asian Immigrants In North America With HIV/AIDS Stigma Vulnerabilities And Human Rights:

Asian Immigrants in North America with HIV/AIDS AKM Ahsan Ullah, Ahmed Shafiqul Huque, 2014-08-31 This book explores a number of issues related to the stigma arising from HIV AIDS infection perceived or actual discrimination from the community and society and the extent of vulnerabilities for infected Asian refugees and immigrants. It assesses the health care and treatment regimen for HIV AIDS accessed by immigrants and refugee claimants in North America including treatments offered by the health care system and ethnic communities and their perceptions and biases relating to HIV AIDS issues. On another level the book identifies the ways in which HIV sufferer immigrants and refugees/refugee claimants from Asia are vulnerable to discrimination due to 1 lack of information about HIV AIDS incidence in the community 2 inability of the health system to respond appropriately and 3 the community's need for introspection on their own health issues. This book reveals the dynamics that influence choice behavior and lifestyle of HIV sufferer immigrants, adds to the existing knowledge about refugees and migrants and proposes a unified theory of discrimination and stigmatization within the context of human rights. In addition the book presents a number of policy recommendations based on empirical findings with a view to helping reshape policies regarding refugee HIV sufferers and their social ramifications. This book will be of interest to researchers and students in any field from social sciences health and psychology as well as practitioners in the field of development and public policy. The book will be beneficial to policy formulators and implementers engaged in addressing the serious threat emanating from the HIV AIDS pandemic.

The Migration Myth in Policy and Practice AKM Ahsan Ullah, Md Shahidul Haque, 2020-01-01. This book investigates the long-term impact of migration on development, engaging in a thorough analysis of the pertinent factors in migration. Migration scholars and stakeholders have long placed emphasis on the necessity of migration for development. At the heart of this book is the question: Has migration made development necessary, or is it the other way around? While existing literature is predominantly occupied with positive impressions about the migration-development nexus, this book challenges associated pervasive generalizations about the impact of migration, indicating that migration has not impacted all regions equally. This volume thus grapples with the different extents to which migration has impacted development by delving into the social costs that migrants often pay in the long run. With empirical support, this book proffers that some countries are becoming over-dependent on migration. An excellent resource for both policymakers working on migration policy and scholars in international relations, migration and development studies, this book presents a range of innovative ideas in relation to the remittance-development nexus.
