Archipelago Portraits Of Life In The Worlds Most Remote Island Sanctuary:

National Geographic, the Wildlife Photographs John G. Mitchell, 2006 **Archipelago 2007 Wall** National Geographic Society Staff, 2006-07 Legendary fine art photographers and award winning environmentalists David Liittschwager and Susan Middleton the team that brought you the critically acclaimed *Remains of a Rainbow* join forces once again to showcase a breathtaking selection of the native flora and fauna of the remote Northwestern Hawaiian Islands both terrestrial and marine. With more than 300 stunning images this book illustrates the spectacular diversity of these oceans and Island creatures as well as profiles many of the people dedicated to the preservation of this habitat. Home to nearly seventy percent of our nation's coral reefs. Known as the rainforests of the sea the Northwestern Hawaiian Islands is a remarkable ecosystem that supports a vast array of interdependent native plants and animals that have evolved in this habitat over millions of years many existing nowhere on the planet. The inaccessibility of these islands and the need to protect them means that few people will ever be able to visit them in person though now for the first time the area's inhabitants are available for all the world to see through this calendar.

A World in One Cubic Foot David Liittschwager, 2012-11-21 Twelve inches by twelve inches by twelve inches the cubic foot is a relatively tiny unit of measure compared to the whole world. With every step we disturb and move through cubic foot after cubic foot. But behold the cubic foot in nature from coral reefs to cloud forests to tidal pools even in that finite space you can see the multitude of creatures that make up a vibrant ecosystem. For *A World in One Cubic Foot* esteemed nature photographer David Liittschwager took a bright green metal cube measuring precisely one cubic foot and set it in various ecosystems around the world from Costa Rica to Central Park. Working with local scientists he measured what moved through that small space in a period of twenty four hours. He then photographed the cube's setting and the plant animal and insect life inside it anything visible to the naked eye. The result is a stunning portrait of the amazing diversity that can be found in ecosystems around the globe. Many organisms captured in Liittschwager's photographs have rarely if ever been presented in their full splendor to the general reader and the singular beauty of these images evocatively conveys the richness of life around us and the essential need for its conservation. The breathtaking images are accompanied by equally engaging essays that speak to both the landscapes and the worlds contained within them from distinguished contributors such as Elizabeth Kolbert and Alan Huffman in addition to an introduction by E O Wilson. After encountering this book you will never look at the tiniest sliver of your own backyard or neighborhood park the same way instead you will be stunned by the unexpected variety of species found in an area so small. *A World in One Cubic Foot* puts the world accessibly in our hands and allows us to behold the magic of an ecosystem in miniature. Liittschwager's awe inspiring photographs take us to places both familiar and exotic and instill new awareness of the life that abounds all around.

Islands Beyond the Horizon Roger Lovegrove, 2012-09-13 Renowned naturalist Roger Lovegrove has travelled to the world's remotest islands from the South Seas to the Arctic Circle. They are beautiful dangerous and inspiring. Here he tells the story of twenty each a self

contained habitat with a delicately balanced ecosystem and each its tales of humans who have settled despoiled or cared for them
