Asian American Political Participation Emerging Constituents And Their Political Identities:

Asian American Political Participation Janelle S. Wong, S. Karthick Ramakrishnan, Taeku Lee, Jane Junn, Janelle Wong, 2011-10-01 Asian Americans are a small percentage of the U S population but their numbers are steadily rising from less than a million in 1960 to more than 15 million today They are also a remarkably diverse population representing several ethnicities religions and languages and they enjoy higher levels of education and income than any other U S racial group Historically socioeconomic status has been a reliable predictor of political behavior So why has this fast growing American population which is doing so well economically been so little engaged in the U S political system *Asian American Political Participation* is the most comprehensive study to date of Asian American political behavior including such key measures as voting political donations community organizing and political protests The book examines why some groups participate while others do not why certain civic activities are deemed preferable to others and why Asian socioeconomic advantage has so far not led to increased political clout *Asian American Political Participation* is based on data from the authors groundbreaking 2008 National Asian American Survey of more than 5 000 Chinese Indian Vietnamese Korean Filipino and Japanese Americans The book shows that the motivations for and impediments to political participation are as diverse as the Asian American population For example native born Asians have higher rates of political participation than their immigrant counterparts particularly recent adult arrivals who were socialized outside of the United States Protest activity is the exception which tends to be higher among immigrants who maintain connections abroad and who engaged in such activity in their country of origin Surprisingly factors such as living in a new immigrant destination or in a city with an Asian American elected official do not seem to motivate political behavior neither does ethnic group solidarity Instead hate crimes and racial victimization are the factors that most motivate Asian Americans to participate politically Involvement in non political activities such as civic and religious groups also bolsters political participation Even among Asian groups socioeconomic advantage does not necessarily translate into high levels of political participation Chinese Americans for example have significantly higher levels of educational attainment than Japanese Americans but Japanese Americans are far more likely to vote and make political contributions And Vietnamese Americans with the lowest levels of education and income vote and engage in protest politics more than any other group Lawmakers tend to favor the interests of groups who actively engage the political system and groups who do not participate at high levels are likely to suffer political consequences in the future *Asian American Political Participation* demonstrates that understanding Asian political behavior today can have significant repercussions for Asian American political influence tomorrow

Kirk,2021-12-08

Nikki Haley has been an emerging force in American politics her star power burnished over a decade that has seen her move from the national spotlight to the global stage In Rising Star political scientist Jason A Kirk analyzes her ascendance in the Republican Party from her governorship of South Carolina during which she faced extraordinary challenges in a state reckoning with tragedy race and its own history to her elevated profile as Donald Trump s ambassador to the United Nations where as the daughter of immigrants and a woman of color she became the face of his America First policy to the world In considering a wide range of perspectives Kirk illuminates how the combination of Haley s political talents and her identity as

an Indian American Christian southern woman has made her an unlikely bridge between the Trump years and the GOP's embattled path forward

Redefining Race Dina G. Okamoto, 2014-09-25

In 2012 the Pew Research Center issued a report that named Asian Americans as the highest income best educated and fastest growing racial group in the United States. Despite this seemingly optimistic conclusion over thirty Asian American advocacy groups challenged the findings. As many pointed out the term Asian American itself is complicated. It currently denotes a wide range of ethnicities, national origins, and languages and encompasses a number of significant economic and social disparities.

In *Redefining Race* sociologist Dina G. Okamoto traces the complex evolution of this racial designation to show how the use of Asian American as a panethnic label and identity has been a deliberate social achievement negotiated by members of this group themselves rather than an organic and inevitable process. Drawing on original research and a series of interviews, Okamoto investigates how different Asian ethnic groups in the U.S. were able to create a collective identity in the wake of the Civil Rights movement in the 1960s. Okamoto argues that a variety of broad social forces created the conditions for this developing panethnic identity. Racial segregation, for example, shaped how Asian immigrants of different national origins were distributed in similar occupations and industries. This segregation of Asians within local labor markets produced a shared experience of racial discrimination which encouraged Asian ethnic groups to develop shared interests and identities. By constructing a panethnic label and identity, ethnic group members took part in creating their own collective histories and in the process challenged and redefined current notions of race. The emergence of a panethnic racial identity also depended somewhat paradoxically on different groups organizing along distinct ethnic lines in order to gain recognition and rights from the larger society. According to Okamoto, these ethnic organizations provided the foundation necessary to build solidarity within different Asian origin communities. Leaders and community members who created inclusive narratives and advocated policies that benefited groups beyond their own were then able to move these discrete ethnic organizations toward a panethnic model. For example, a number of ethnic specific organizations in San Francisco expanded their services and programs to include other ethnic group members after their original constituencies dwindled. A Laotian organization included refugees from different parts of Asia, a Japanese organization began to advocate for South Asian populations, and a Chinese organization opened its doors to Filipinos and Vietnamese. As Okamoto argues, the process of building ties between ethnic communities while also recognizing ethnic diversity is the hallmark of panethnicity.

Redefining Race is a groundbreaking analysis of the processes through which group boundaries are drawn and contested. In mapping the genesis of a panethnic Asian American identity, Okamoto illustrates the ways in which concepts of race continue to shape how ethnic and immigrant groups view themselves and organize for representation in the public arena.
