Robert M. Clark, Simon Hakim, Avi Ostfeld, 2011-09-01 Following the events of 9 11 the Administrator of the US Environmental Protection Agency created the Water Protection Task Force WPTF which identified water and wastewater systems as a major area of vulnerability to deliberate attack The WPTF suggested that there are steps that can be taken to

reduce these vulnerabilities and to make it as difficult as possible for potential saboteurs to succeed The WPTF recommended that be scrutinized with renewed vigor to secure water and wastewater systems against these possible threats It also recommended that water and wastewater systems have a response plan in place in the event an act of terrorism occurs The WPTF identified water distribution networks as an area of special vulnerability and highlighted the need for rapid on line detection methods that are accurate and have a wide detection range As a result of these recommendations novel technologies from various fields of science and engineering are now addressing water security issues and water and wastewater utilities are looking for innovative solutions Once such technologies are available there will be a rapid implementation process that will present many business opportunities for the private sector However in addition to terrorist threats water and wastewater systems are inherently vulnerable to natural disasters such as earthquakes and floods This volume will address the problems associated with both intended terrorist attacks and natural disasters affecting water or wastewater systems The book is divided into parts based on the kinds of threats facing water and wastewater systems 1 a direct attack on water and wastewater infrastructure storage reservoirs and distribution and collection networks 2 a cyber attack disabling the functionality of the water and wastewater systems or taking over control of key components which might result in system failures and 3 a deliberate chemical or biological contaminant injection at one of the waterdistribution system s nodes It will examine unique plans technological and managerial innovations for protecting such systems and includes descriptions of projects that were implemented to respond to natural disasters Case studies are presented that discuss existing projects and evaluate their performance with an emphasis on providing guidelines and techniques that can be implemented by water and wastewater planners and managers to deal with natural and manmade disasters should they occur

Eco-Warriors, Nihilistic Terrorists, and the Environment Lawrence E. Likar, 2011-04-07 The first book to thoroughly address the topic this volume examines the ideologies tactics and goals of environmental terrorists and offers a security planning methodology to defend against their attacks To counter eco terrorism we must understand why it occurs Eco Warriors Nihilistic Terrorists and the Environment is a comprehensive examination of the vulnerability of the natural environment of its nexus with the strategic goals of terrorists and of a security planning methodology that can prevent or ameliorate environmentally linked attacks The first book to comprehensively address the prevention of environmentally focused terrorism this work looks at the environment and the private and government facilities that impact it as assets to be protected Focusing on the capability of lone wolf terrorists and small self radicalizing cells to commit effective violent acts security expert Lawrence E Likar furnishes personality and operational profiles of both nihilistic and eco warrior terrorists showcasing an essential component of the behavioral science based security planning methodology he promotes Most critically the book addresses the gap in current security planning methodology and literature and it reveals novel intelligence gathering techniques operational procedures and countermeasures designed to defend against attacks
