Assessing Critical Thinking in Elementary Schools Rebecca Stobaugh, 2013-09-27 This practical very effective resource helps elementary school teachers and curriculum leaders develop the skills to design instructional tasks and assessments that engage students in higher level critical thinking as recommended by the Common Core State Standards Real examples of formative and summative assessments from a variety of content areas are included and demonstrate how to successfully increase the level of critical thinking in every elementary classroom This book is also an excellent resource for higher education faculty to use in undergraduate and graduate courses on assessment and lesson planning Critical Thinking for Addiction Professionals Michael J. Taleff, 2006-01-18 Learn to Think Critically and Make Better Decisions Addiction professionals make decisions everyday that impact people's lives Sometimes these decisions are solid and sometimes they are the result of flawed thinking which often results from myths and generalizations that are perpetuated in the field Thinking flaws are common not just in counselors but in supervisors administrators and presenters and can lead to potentially negative outcomes both for clients and for programs In this easy to read guide the first to bring together critical thinking and addiction work critical thinking expert and addiction professional Dr Michael J Taleff offers readers the tools they need to think critically and make better decisions Readers learn To evaluate their critical thinking abilities The characteristics of a critical thinking professional What drives bad thinking in addiction work How to recognize and avoid thinking fallacies The ethics and consequences of using critical thinking Dr Taleff has provided an insightful analysis of the kinds of thinking errors often made by counselors The text should be required reading in all areas of health and human services The concepts and discussion are as valuable to experienced helpers as they are to novices Gregory Blevins Ph D Professor Governors State University **U.S. Army The Applied Critical Thinking Handbook** , Why Red Teaming The premise of the program at the University of Foreign Military and Cultural Studies UFMCS is that people and organizations court failure in predictable ways that they do so by degrees almost imperceptibly and that they do so according to their mindsets biases and experience which are formed in large part by their own culture and context The sources of these failures are simple observable and lamentably often repeated They are also preventable and that is the point of red teaming Our methods and education involve more than Socratic discussion and brainstorming We believe that good decision processes are essential to good outcomes To that end our curriculum is rich in divergent processes red teaming tools and liberating structures all aimed at decision support We educate people to develop a disposition of curiosity and help them become aware of biases and behavior that prevent them from real positive change in the ways they seek solutions and engage others We borrow techniques methods frameworks concepts and best practices from several sources and disciplines to create an education and practical applications that we find to be the best safeguard against individual and organizational tendencies

toward biases errors in cognition and groupthink Red teaming is diagnostic preventative and corrective yet it is neither predictive or a solution Our goal is to be better prepared and less surprised in dealing with complexity What is Red Teaming Red teaming is a function that provides commanders an independent capability to fully explore alternatives in plans operations concepts organizations and capabilities in the context of the operational environment OE and from the perspectives of partners adversaries and others A Red Team performs three general types of tasks Support to operations planning and decision support Critical review and analysis of already existing plans Intelligence support Threat Emulation UFMCS provides education for the first two tasks TRADOC s Intelligence School and Center provides education on the third In order for a Red Team to effectively contribute to decision making all of the following elements are required The ability to think critically about the problem While this may seem obvious the reality is that critical thinking is a skill set that requires training education and tools The Army assimilates people from different backgrounds across the nation One of the drawbacks of that assimilation is our military tendency to reflect the same biases and perspectives We pride ourselves in common values which while ingrained in the Army culture are not universal outside of that culture Thinking critically and challenging the group is an unnatural act for military staffs Doing so effectively requires tools and methods that enable leaders to see different perspectives Red Teams require top cover to be allowed to challenge the conventional wisdom and the organization s leaders No matter the quality of the Red Team or the methods they employ dictatorial or toxic leaders are incompatible with successful red teaming Red teaming is not easy and not everyone can do it Red Teamers must be effective written and oral communicators They must have credibility in the area in which they are providing red teaming insights They must be able to constructively challenge the plan This means focusing on what is truly important able to explain why it is being challenged and offering some alternative ways to think about the problem
