Assisted Suicide Current Controversies:

Current Controversies in the Biological Sciences Karen F. Greif, Jon F. Merz, 2007-02-23 In recent years advances in biological science and technology have outpaced policymakers attempts to deal with them Current Controversies in the Biological Sciences examines the ways in which the federal government uses scientific information in reaching policy decisions providing case studies of the interactions between science and government on different biomedical biological and environmental issues These case studies document a broad range of complex issues in science policy from the Human Genome Project to tobacco regulation and provide an accessible overview of both the science behind the issues and the policy making process The cases illustrate the different ways in which science and politics intersect in policy decisions as well as the different forms policy itself may take including not only regulatory action but the lack of regulation Among the topics examined are public and private research funding as seen in gene patenting reluctance to regulate even when a product has been proven unhealthy as in the case of tobacco a comparison of U S and international policy responses to genetically modified organisms and the competing interests at play in air pollution policy Each chapter includes shorter side essays on related topics for example essays on issues raised by the SARS epidemic accompany the detailed case study of the public health response to the anthrax laced mail received in the weeks after 9 11 This clear and readable introduction to controversial issues in the biological sciences will be a valuable resource for students of science policy and bioethics and for professionals in industry government and nongovernmental organizations who need background on emerging issues in the biological sciences

Assisted Suicide Laura K. Egendorf, 1998 Proponents of assisted suicide argue that terminally ill patients who are suffering extreme pain should be allowed to request help in ending their lives Others insist that the role of physicians family members and friends is to make the terminally ill as comfortable as possible while they die not to help them end their lives Chapters include Is Assisted Suicide Ethical Should Physician Assisted Suicide Be Legalized Is Assisted Suicide a Constitutional Right How Would Assisted Suicide Affect Individual s Rights Copyright Libri GmbH All rights reserved
