ISBN: 978-0-596-52923-9

Release Date: January 19, 2007

The release of ActionScript 3.0 represents the most significant change in ActionScript since Flash was introduced. With each new version of Flash, developers and designers saw incremental changes in ActionScript. ActionScript 1.0 slowly grew with each new version of Flash. Then ActionScript 2.0 introduced user classes stored in separate files and the first inkling of a true object-oriented programming language.

With ActionScript 3.0 is not only a programming language for developing object-oriented applications, but the first major implementation of ECMAScript Ed4, the current Internet language standard. This means that you're not just learning ActionScript 3.0, but you're also learning all the ECMAScript-based languages to come. Instead of being the language just for Flash 9 and Flex 2, ActionScript 3.0 is the language of the Internet.
