Banach Spaces of Analytic Functions Thomas H. MacGregor, 2008 This volume is focused on Banach spaces of functions

analytic in the open unit disc such as the classical Hardy and Bergman spaces and weighted versions of these spaces Other spaces under consideration here include the Bloch space the families of Cauchy transforms and fractional Cauchy transforms BMO VMO and the Fock space Some of the work deals with questions about functions in several complex variables

Lectures on Analytic Function Spaces and their Applications Javad Mashreghi, 2023-10-13 The focus program on Analytic Function Spaces and their Applications took place at Fields Institute from July 1st to December 31st 2021 Hilbert spaces of analytic functions form one of the pillars of complex analysis These spaces have a rich structure and for more than a century have been studied by many prominent mathematicians They have essential applications in other fields of mathematics and engineering The most important Hilbert space of analytic functions is the Hardy class H^2 However its close cousins the Bergman space A^2 the Dirichlet space D the model subspaces K_t and the de Branges Rovnyak spaces H^b have also garnered attention in recent decades Leading experts on function spaces gathered and discussed new achievements and future venues of research on analytic function spaces their operators and their applications in other domains With over 250 hours of lectures by prominent mathematicians the program spanned a wide variety of topics More explicitly there were courses and workshops on Interpolation and Sampling Riesz Bases Frames and Signal Processing Bounded Mean Oscillation de Branges Rovnyak Spaces Blaschke Products and Inner Functions and Convergence of Scattering Data and Non linear Fourier Transform among others At the end of each week there was a high profile colloquium talk on the current topic The program also contained two advanced courses on Schramm Loewner Evolution and Lattice Models and Reproducing Kernel Hilbert Space of Analytic Functions This volume features the courses given on Hardy Spaces Dirichlet Spaces Bergman Spaces Model Spaces Operators on Function Spaces Truncated Toeplitz Operators Semigroups of weighted composition operators on spaces of holomorphic functions the Corona Problem Non commutative Function Theory and Drury Arveson Space This volume is a valuable resource for researchers interested in analytic function spaces

[The Cauchy Transform](#) Joseph A. Cima, Alec L. Matheson, William T. Ross, 2006 The Cauchy transform of a measure on the circle is a subject of both classical and current interest with a sizable literature This book is a thorough well documented and readable survey of this literature and includes full proofs of the main results of the subject This book also covers more recent perturbation theory as covered by Clark Poltoratski and Aleksandrov and contains an in depth treatment of Clark measures

Function Theory and p Spaces Raymond Cheng, Javad Mashreghi, William T. Ross, 2020-05-28 The classical p sequence spaces have been a mainstay in Banach spaces This book reviews some of the foundational results in this area the basic inequalities duality convexity geometry as well as connects them to the function theory boundary growth conditions zero sets extremal functions multipliers operator theory of the associated spaces pA of analytic functions whose Taylor coefficients belong to p Relations between the Banach space p and its associated function space are uncovered using tools from Banach space geometry including Birkhoff James orthogonality and the resulting Pythagorean inequalities The authors survey the literature on all of

this material including a discussion of the multipliers of pA and a discussion of the Wiener algebra 1A Except for some basic measure theory functional analysis and complex analysis which the reader is expected to know the material in this book is self contained and detailed proofs of nearly all the results are given Each chapter concludes with some end notes that give proper references historical background and avenues for further exploration **Automata, Languages, and Programming** Magnús M.
