Beginning Of An Era Los Alamos 1943 1945:

Beginning of an Era ,2007 Los Alamos Los Alamos Scientific Laboratory,1967 Historien om USAs udvikling af atombomben som satte et brat punktum p 2 verdenskrig *Los Alamos: Beginning of an Era, 1943-1945* Los Alamos Scientific Laboratory. Public Relations Office,1974 *Los Alamos* ,1986 **Los Alamos** Los Alamos Scientific Laboratory Public Relations Staff,1992 **Los Alamos** ,1979 *The Manhattan Project* Sue Vander Hook,2011-01-01 Explores events leading up to the top secret Manhattan Project during World War II key players involved their lives during the project the development and use of the atomic bomb its aftermath and its effects on society *Atomic Bomb: The Story of the Manhattan Project* Bruce Cameron Reed,2015-06-01 This volume prepared by an acknowledged expert on the Manhattan Project gives a concise fast paced account of all major aspects of the project at a level accessible to an undergraduate college or advanced high school student familiar with some basic concepts of energy atomic structure and isotopes The text describes the underlying scientific discoveries that made nuclear weapons possible how the project was organized the daunting challenges faced and overcome in obtaining fissile uranium and plutonium and in designing workable bombs the dramatic Trinity test carried out in the desert of southern New Mexico in July 1945 and the bombings of Hiroshima and Nagasaki **Los Alamos** Los Alamos Scientific Laboratory,U. S. Government,2017-10-16 This is the story of one of the greatest scientific achievements of all time It is the story of the founding of the Los Alamos Scientific Laboratory and its successful secret mission to create the first atomic bomb the weapon that ended World War II This compilation also includes the extensive comments of Hans Bethe on the history of the hydrogen bomb in which he recounts his opposition to the development of the weapon Part One Starting Point Military and Scientific Realities of 1943 Military considerations had government make the decision by 1943 that an atomic bomb was desirable as a means for bringing World War II to an end Scientific considerations had governed the decision that an atomic bomb was probably feasible Technological considerations already being worried about though they were almost entirely in the realm of the unknown had made it obvious that the atomic bomb would not be built in a day or a month or a year The military picture was grim The USA was at war with Japan Germany and Italy American naval power had not yet recovered from the disaster at Pearl Harbor The Japanese had conquered the Philippines and Japanese naval power was at its height American soldiers were heavily engaged in North Africa and elsewhere The Germans had barely begun to suffer the reverses that would turn the tide of war against them They surrendered El Alamein late in 1942 and Stalingrad in 1943 German scientists were working no American knew how ineffectively toward an atomic bomb The scientific picture was exciting The phenomenon of uranium fission had been observed several years earlier and had been correctly interpreted before 1940 It was known that at least one kind of uranium nucleus would divide roughly in half upon absorption of a neutron and that this reaction liberated energy plus more neutrons In December 1942 a Chicago group under Enrico Fermi had succeeded in bringing about the world's first man made nuclear

chain reaction a reaction in which the neutrons from fission caused further fission at a sustained level The technological picture was very nearly a blank so far as atomic bombs were concerned This was true not only because no one had ever tried to build an atomic bomb but because so much fundamental scientific research remained to be done before anyone ever could Enough was known already to suggest the magnitude of the task both scientifically and technologically It was known for instance that the essential fissionable material the heart of the bomb would be hard to prepare *The Day the Sun Rose Twice* Ferenc Morton Szasz, 1995-04-01 Winner of the Western History Association's Robert G Athearn Award for outstanding book on the twentieth century American West Just before dawn on July 16 1945 the world's first nuclear bomb was detonated at Trinity Site in an isolated stretch of the central New Mexico desert It may have been the single most important event of the twentieth century *The Day the Sun Rose Twice* tells the fascinating story of the events leading up to this first test explosion the characters and roles of the people involved and the aftermath of the bomb's successful demonstration With J Robert Oppenheimer the father of the atomic bomb at last getting his Hollywood close up in Christopher Nolan's new blockbuster film *Oppenheimer* readers can discover the background behind the world's first atomic blast in Ferenc Morton Szasz's award winning history Tightly focused lucidly written and thoroughly researched according to the New York Times Book Review the book provides a valuable introduction to how our nuclear dilemma began
