Behind East Asian Growth The Political And Social Foundations Of Prosperity:

Behind East Asian Growth Henry S. Rowen, 1998 East Asian countries have adopted remarkably good policies to ensure sustained economic growth but how did they come to adopt such policies in the first place This book produces a more thorough explanation than has previously been advanced drawing on several disciplines including contributions from anthropologists economists political scientists technologists demographers historians and psychologists Several contributors have held high positions in Asian governments Four broad themes are identified effective governance achieving and learning societies growth with equity external influences This is the most comprehensive account of the foundations of East Asia's rise Its distinctiveness lies in the range of comparisons across the countries of East and South East Asia and in the wide array of contributing disciplines The Rise and Fall of the East Asian Growth System, 1951-2000 Huang Xiaoming, 2004-11-10 Huang gives important and high quality research on the economic growth in East Asia from 1945 to the present assessing the various theories put forward to explain the phenomenon and appraising the various factors which have contributed to economic growth in East Asia *Forming the Academic Profession in East Asia* Terri Kim, 2018-10-10 Originally published in 2001 *Forming the Academic Profession in East Asia* examines the changing shape of the academic profession in South Korea Malaysia and Singapore since the colonial period and as a reflection of both the inherited models of higher education and their redefinition after the colonial period The analysis takes into account the connections and disconnections between the colonial and postcolonial periods in shaping the academic profession **The Political and Economic Transition in East Asia** Xiaoming Huang, 2013-09-05 The book examines the political and economic developments in East Asia since the end of the Cold War in an attempt to identify a broad pattern of transition particularly in terms of the reshaping of the state's relations with forces and institutions in economy politics and domestic international interactions The chapters are organised into three parts I The state in the new economy II The state in the new politics III The state in the new global environment The contributors find a general pattern of the state's withdrawal from these three areas But it is not simply that the market takes over as some envisaged Instead the transition is moving towards a set of governance producing arrangements in which the role of both the market and the state are appreciated The book concludes that a more sophisticated approach is needed to the problems of development vs governance the state vs the market and global dynamics vs national interests for a better understanding of the dynamic transition and the consequent new political economy in East Asia **East Asian Visions** Indermit Singh Gill, Yukon Huang, Homi J. Kharas, 2007 Despite the diversity in income levels languages culture resource endowments and political systems the countries of East Asia are more integrated now than they have ever been Goods money and ideas are being traded across the region East Asia is redefining itself from a collection of disparate nations that looked mainly to markets in the west to a more self-reliant innovative and networked region Countries in this region are strengthening ties with each other and seeking more strategic partnerships with the rest of the world *East Asian Visions* is a

collection of essays that convey firsthand how some of the most influential thinkers in East Asia view these challenges The writers are eminent policy makers statesmen and scholars They write about how competition with the west has bred success how crises in the region have provoked introspection and how the rise of China is catalyzing change *The Politics of Uneven Development* Richard F. Doner,2009-02-16 Richard Doner compares Thai economic development with competing nations revealing how specific political factors shape institutional capacity in each Manipulating Globalization Ling Chen,2018-06-12 The era of globalization saw China emerge as the world's manufacturing titan However the made in China model with its reliance on cheap labor and thin profits has begun to wane Beginning in the 2000s the Chinese state shifted from attracting foreign investment to promoting the technological competitiveness of domestic firms This shift caused tensions between winners and losers leading local bureaucrats to compete for resources in government budget funding and tax breaks While bureaucrats successfully built coalitions to motivate businesses to upgrade in some cities in others vested interests within the government deprived businesses of developmental resources and left them in a desperate race to the bottom In *Manipulating Globalization* Ling Chen argues that the roots of coalitional variation lie in the type of foreign firms with which local governments forged alliances Cities that initially attracted large global firms with a significant share of exports were more likely to experience manipulation from vested interests down the road compared to those that attracted smaller foreign firms The book develops the argument with in depth interviews and tests it with quantitative data across hundreds of Chinese cities and thousands of firms Chen advances a new theory of economic policies in authoritarian regimes and informs debates about the nature of Chinese capitalism Her findings shed light on state led development and coalition formation in other emerging economies that comprise the new globalized generation **The Battle for Asia** Mark T. Berger,2004 This book is a history of the Asian region from 1945 to the present day which delineates the various ideological battles over Asia's development *The Nature of Asian Politics* Bruce Gilley,2014-09-15 *The Nature of Asian Politics* is a broad and thematic treatment of the fundamental factors that characterize politics in the fourteen key countries of Southeast and Northeast Asia Bruce Gilley begins with an overview of state society relations then moves on to the fundamental questions of development and democracy and finally shifts to an exploration of governance and public policy in the region This book proposes an Asian governance model that is useful for understanding politics from Japan to Indonesia By reviving an earlier paradigm known as oriental despotism and applying it to political theories on the Asian region this book is likely to attract wide debate among students of Asian politics and among Western policy makers seeking to engage the region Security Policy Dynamics Byung-ok Kil,2017-10-05 This title was first published in 2001 Byung ok Kil's thorough analysis deals with both the broad area of public policy and the specific topic of national security policy change in Korea Using an historical comparative approach he tests the relative importance of international and domestic developments as determinants of security policy change Drawing extensively on carefully selected sources of quantitative and qualitative data including

original documents and interviews this engaging text is of theoretical methodological and applied policy relevance to the academic community and of substantive interest to a broader audience of governmental officials in national security and related policy areas
