Adaptive Scalarization Methods In Multiobjective Optimization Vector Optimization:

Adaptive Scalarization Methods in Multiobjective Optimization Gabriele Eichfelder, 2008-05-06 This book presents adaptive solution methods for multiobjective optimization problems based on parameter dependent scalarization approaches Readers will benefit from the new adaptive methods and ideas for solving multiobjective optimization Recent Developments in Vector Optimization Qamrul Hasan Ansari, Jen-Chih Yao, 2011-09-21 We always come across several decision making problems in our daily life Such problems are always conflicting in which many different view points should be satisfied In politics business industrial systems management science networks etc one often encounters such kind of problems The most important and difficult part in such problems is the conflict between various objectives and goals In these problems one has to find the minimum or maximum for several objective functions Such problems are called vector optimization problems VOP multi criteria optimization problems or multi objective optimization problems This volume deals with several different topics aspects of vector optimization theory ranging from the very beginning to the most recent one It contains fourteen chapters written by different experts in the field of vector optimization **Vector Optimization with**

Infimum and Supremum Andreas Löhne, 2011-05-25 The theory of Vector Optimization is developed by a systematic usage of infimum and supremum In order to get existence and appropriate properties of the infimum the image space of the vector optimization problem is embedded into a larger space which is a subset of the power set in fact the space of self infimal sets Based on this idea we establish solution concepts existence and duality results and algorithms for the linear case The main advantage of this approach is the high degree of analogy to corresponding results of Scalar Optimization The concepts and results are used to explain and to improve practically relevant algorithms for linear vector optimization problems

Optimization, Variational Analysis and Applications Vivek Laha, Pierre Maréchal, S. K. Mishra, 2021-07-27 This book includes selected papers presented at the Indo French Seminar on Optimization Variational Analysis and Applications IFSOVAA 2020 held at the Department of Mathematics Institute of Science Banaras Hindu University Varanasi India from 2-4 February 2020 The book discusses current optimization problems and their solutions by using the powerful tool of variational analysis Topics covered in this volume include set optimization multiobjective optimization mathematical programs with complementary equilibrium vanishing and switching constraints copositive optimization interval valued optimization sequential quadratic programming bound constrained optimization variational inequalities and more Several applications in different branches of applied mathematics engineering economics finance and medical sciences have been included Each chapter not only provides a detailed survey of the topic but also builds systematic theories and suitable algorithms to deduce the most recent findings in literature This volume appeals to graduate students as well as researchers and practitioners in pure and applied mathematics and related fields that make use of variational analysis in solving optimization problems
