Achenbach Child Behavior Manual:

Manual for the Child Behavior Checklist/4-18 and 1991 Profile Thomas M. Achenbach, 1991-01-01 The Child Behavior Checklist for ages 4-18 is designed to record children's competencies and problems as reported by their parents or parent surrogates. It can be self-administered or administered by an interviewer. The 20 competence items obtain parents' reports of the amount and quality of their child's participation in sports, hobbies, games, activities, jobs, and chores, and friendships; how well the child gets along with others and plays and works alone; and school functioning. Each of the 118 specific problem items and two open-ended problem items are scored on a 3-step response scale. The Checklist is intended as only one component of many, including teacher reports, standardized tests, physical assessment, and direct assessment of the child. Reliability and validity are discussed.

Handbook of Psychological and Educational Assessment of Children Cecil R. Reynolds, Randy W. Kamphaus, 2018-10-16 The two volumes of the Handbook of Psychological and Educational Assessment of Children, Second Edition, cover all aspects of child and adolescent assessment. Leading clinical scientists summarize the state of the science of assessment, paradigms, instruments, and methods. With an emphasis on practical clinical considerations, chapters also delve into issues related to test development, psychometrics, and bias. Conveniently designed for reference or text use, this vast knowledge base has been synthesized into two volumes which may be purchased separately or together.

INTELLIGENCE, APTITUDE, AND ACHIEVEMENT surveys assessment of intelligence, learning styles, and academic achievement; covers historical issues and psychometric methods; and addresses diversity issues, ethical concerns, and special topics in mental testing.

PERSONALITY, BEHAVIOR, AND CONTEXT reviews the use of projective methods, interviewing, and observation; and objective methods of assessing personality and behavior; discusses the assessment of specific syndromes and symptoms; and presents tools for assessing adaptive skills and the family context.

Clinical Assessment of Child and Adolescent Personality and Behavior Paul J. Frick, Christopher T. Barry, Randy W. Kamphaus, 2009-12-12 Psychologists offer an increasing variety of services to the public Among these services psychological assessment of personality and behavior continues to be a central activity One main reason is that other mental health professionals often do not possess a high level of competence in this area And when dealing with children and adolescents psychological assessment seems to take on an even greater role Therefore it follows that comprehensive graduate level instruction in assessment should be a high priority for educators of psychologists who will work with these youth This textbook is organized into three sections consistent with the authors approach to teaching Part I provides students with the psychological knowledge base necessary for modern assessment practice including historical perspectives measurement
