Preview for ACS-Standardized final Exam

1. 70 Multiple Choice questions, 110 minute. Bring a Scantron, calculator and pencil(s)
2. Scoring is based on correct answers. **if you don't know the answer, it pays to guess.** It especially pays to rule out one or two obviously incorrect answers, even if you aren't sure about which answer is actually correct.
3. Total time will be 110 minutes. This means you have 1 minute and 34 seconds per question. Time management is important, but most students complete in time. A more common error than going too slow is to work too fast, hurrying early in the test and not taking enough time to carefully read through the questions and look at all the answers. I think it is foolish to every leave before time expires on a multiple choice exam, because the time wasted by leaving early will usually be enough to have rechecked several guess problems and to have eliminated some impossible answers. If time permits, you would like to answer the problem on your own, and then see if your answer matches one of the listed alternatives.
4. There are likely going to be questions that you do not know. While you will not get them all right (a student can totally guess on 15 questions and still get an A!), the key is that you get at least some of the questions absolutely certain, and can make an educated guess on a reasonable portion of the rest.
5. Scores, percentiles, and Grades. The statistical analysis is based on the performance of 1,000 students. Shown below are some raw scores with the corresponding nation percentiles, and the grade that will correspond.
