Center for the Built Environment, 2016 Patty's Industrial Hygiene, Volume 4 Barbara Cohrssen, 2021-03-25 Since the first edition in 1948 Patty s Industrial Hygiene and Toxicology has become a flagship publication for Wiley During its nearly seven decades in print it has become a standard reference for the fields of occupational health and toxicology The volumes on industrial hygiene are cornerstone reference works for not only industrial hygienists but also chemists engineers toxicologists lawyers and occupational safety personnel Volume 4 covers environmental and health and safety program management with a

number of new chapters on sustainability construction health and safety health and safety of new energies and working with cannabis **Energy Research Abstracts** ,1986 **Low Energy Low Carbon Architecture** Khaled Al-Sallal,2016-05-05

Providing a complete and in depth overview of the available knowledge in the area of low energy and low carbon architecture The scope of this edited book includes several important topics ranging from chapters giving a broad view of the progressing models in ecologically responsible environments to other chapters focussing on recent advances in design strategies and building technologies in low energy heating cooling daylighting materials and building sustainable systems The book will give the readers insight to the future of low energy and low carbon architecture in the beyond green era and discussed in the broader context of the progressing theories of regenerative design *Passive Solar Energy Programs and Plans* United States. Congress. House. Committee on Science and Technology. Subcommittee on Advanced Energy Technologies and Energy Conservation Research, Development, and Demonstration,1978 *Building Reuse* Kathryn Rogers Merlino,2018-06-01

How to reimagine existing buildings to create a more sustainable future The construction and operation of buildings is responsible for 41 percent of all primary energy use and 48 percent of all carbon emissions and the impact of the demolition and removal of an older building can greatly diminish the advantages of adding green technologies to new construction In *Building Reuse* Kathryn Rogers Merlino makes an impassioned case that truly sustainable design requires reusing and reimagining existing buildings Additionally Merlino calls for a more expansive view of preservation that goes beyond keeping only the most distinctive structures based on their historical and cultural significance to embrace the creative reuse of even unremarkable buildings for their environmental value *Building Reuse* includes a compelling range of case studies from a private home to an eighteen story office building all located in the Pacific Northwest a region with a long history of sustainable design and urban growth policies that have made reuse projects feasible Reusing existing buildings can be challenging to accomplish but changing the way we think about environmentally conscious architecture has the potential to significantly reduce energy consumption carbon emissions and waste
