

TEMPLATE FOR ACTION RESEARCH PROPOSAL

PARTS OF AN ACTION RESEARCH PROPOSAL	KEY POINTS TO CONSIDER IN WRITING AN ACTION RESEARCH PROPOSAL
TITLE OF ACTION RESEARCH	Integrate in the research title the primary purpose of the study and the intervention to use in addressing the problem.
I. INTRODUCTION	The original source of the problem is discussed in this portion. It is an explanation of the circumstances which prompted the researcher to pursue the study. Observed prevailing and existing conditions related to the problem should be clearly described to justify the choice of the study.
Statement of the Problem	The specific objectives of the action research are presented in question form. They are arranged logically and are introduced using a paragraph that contains the primary purpose of the study.
Hypothesis	It should be stated in a negative statement e.g. There is no significant difference in the Grade 7 students' level of performance in Math before and after the implementation of Math Plus.
II. BRIEF REVIEW OF RELATED LITERATURE AND STUDIES	This part aims to present what has or has not been done on the problem being investigated. It establishes the baseline data about the problem through a review of related readings/studies. This part highlights the importance of the present study by presenting the similarities and differences of the information read to the variables of the present study. It provides a general picture of the research topic. The "Related Literature" is an article written by an expert on the topic being investigated. It may be those statements published in books, journals, periodicals or from electronic sources. Brief discussion of the intervention program and its basis should be completely discussed in this part of action research. The researcher can present what expert says about the topic and contrasts the same to what another person says about. Discussion of related readings should follow the sequence of the specific questions. Writing the related literature, the researchers should consider more updated references particularly when the discussion is focused on innovations and continuous improvement. Local literature should not be separated from foreign literature. "Author, Year" format should be followed in making citations e.g. (Merle, 2017). Materials lifted from electronic sources whose authors are unknown are not reliable. Hence, they should not be taken as reference for an action research. Only research findings and statements which are related in purpose, methods or findings to the present study should be included in the review. Clarify the interrelationships of the studies reviewed and the present study.

Action Research for Teacher Candidates Robert P. Pelton, 2010-10-16 Teachers are the most essential element in a child's success in school. Action Research for Teacher Candidates provides teachers in training with the skills needed for action research, a process that leads to focused, responsive, and effective methods that generate success in school for both teachers and students. This book provides a formula for data-driven results. It details a process ensuring high-level student achievement.

The Wiley Handbook of Action Research in Education Craig A. Mertler, 2019-02-06 Comprehensive overview of the theoretical, conceptual, and applied practical presentations of action research as it is found and conducted solely in educational settings. The Wiley Handbook of Action Research in Education is the first book to offer theoretical, conceptual, and applied practical presentations of action research as it is found and conducted solely in educational settings. Covering primarily PK-12 educational settings, the book utilizes a cross-section of international authors and presentations to provide global perspectives on action research in education. Part I of The Wiley Handbook of Action Research in Education focuses on various foundational aspects and issues related to action research. Part II is centered on chapters that present theories and principles that help to guide the use of action research in educational contexts. Part III focuses on specific applications of educational action research in practice. Part IV provides an outlet for seven educational practitioners to share their experiences in conducting action research. Each of these authors also discusses the importance and value that action research has had on him or her, both professionally and personally. Discuss action research in PK-12 as well as in higher education settings. The first book to focus on the importance and application of action research exclusively in educational settings. Offers world perspectives on action research in education. Written by a team of international scholars. The Wiley Handbook of Action Research in Education is an excellent book for advanced undergraduate students, graduate students, and scholars studying and/or researching educational action research.

Aichele, 1994 *Professional Development for Teachers of Mathematics. 1994 Yearbook* National Council of Teachers of Mathematics, Inc., Reston, VA., 1994 This National Council of Teachers of Mathematics yearbook organized into three parts provides a collection of articles on the professional development of teachers of mathematics. Based on known research, part 1 examines the issues associated with professional development and addresses the stages of the continuum of professional development from general to mathematics-specific perspectives. The articles in part 2 address the initial preparation of teachers of mathematics in grades K-12. A call for changing preservice programs is followed by descriptions of exemplary mathematics teacher education programs at all levels K-12, including a model for a preservice program to prepare elementary mathematics specialists. Part 3 focuses on professional development for practitioners. These articles describe very creative projects and programs from the educational and business communities. High levels of cooperation and collaboration among those constituencies committed to reforming
