As you follow along with the in-depth, hands-on tutorial, you'll learn how to:

- Send sprites zooming around the screen with JavaScript animations
- Make things explode with a jQuery plugin
- Use trigonometry and geometry to detect collisions
- Implement game logic to display levels and respond to player input
- Carry changes in game state with animation and sound

- Add flair to a game interface with CSS transitions and transformations
- Gain pixel-level control over your game display with the HTML canvas

The programming starts right away in Chapter 1—with loading and saving history, or level clearing. Even close at the end of each chapter challenge you to dig in to the bubble shooter's code and modify the game.
