Modelling Maturity Model for Developing Countries Samuel Adekunle, Clinton Ohis Aigbavboa, Obuks

Ejohwomu, Wellington Didibhuku Thwala, Abdul-Majeed Mahamadu, 2023-07-07 This book provides a reference point for the development of Building Information Modelling BIM maturity in the developing country context Developing countries have been observed to have low BIM maturity and are struggling to adopt the technology amidst no clearly defined pathways for achieving BIM capability maturity The research presented in this book provides construction industry stakeholders in developing countries with a framework and nomological map to aid in the advancement of BIM implementation This work provides a pathway for overcoming the challenges inhibiting BIM maturity in developing countries and ultimately its diffusion in order to harness the benefits The authors provide critical theoretical insights on BIM maturity in the developing country context a comparative analysis of BIM maturity in both developing and developed countries and finally a conceptualisation of BIM maturity for developing countries The book is unique as its construct is rooted in the state of the art information management standards in the digitalisation era in the construction industry ISO 19650 The book delivers a theoretical reference point to the academic and research community and for the industry stakeholder an essential guide to achieving BIM maturity at macro and micro levels *Future Challenges in Evaluating and Managing Sustainable Development in the*

Built Environment Peter S. Brandon, Patrizia Lombardi, Geoffrey Q. Shen, 2024-09-23 *Future Challenges in Sustainable Development within the Built Environment* stimulates and reinterprets the demands of Responsible and Sustainable Development in the Built Environment for future action and development It examines the methods of evaluation the use of technology the creation of new models and the role of human factors for examining and developing the subject over the next twenty years *Building Performance Simulation for Design and Operation* Jan L.M. Hensen, Roberto Lamberts, 2019-04-24

When used appropriately building performance simulation has the potential to reduce the environmental impact of the built environment to improve indoor quality and productivity as well as to facilitate future innovation and technological progress in construction Since publication of the first edition of *Building Performance Simulation for Design and Operation* the discussion has shifted from a focus on software features to a new agenda which centres on the effectiveness of building performance simulation in building life cycle processes This new edition provides a unique and comprehensive overview of

building performance simulation for the complete building life cycle from conception to demolition and from a single building to district level It contains new chapters on building information modelling occupant behaviour modelling urban physics modelling urban building energy modelling and renewable energy systems modelling This new edition keeps the same chapter structure throughout including learning objectives chapter summaries and assignments Moreover the book Provides unique insights into the techniques of building performance modelling and simulation and their application to performance based design and operation of buildings and the systems which service them Provides readers with the essential concepts of computational support of performance based design and operation Provides examples of how to use building simulation techniques for practical design management and operation their limitations and future direction It is primarily intended for building and systems designers and operators and postgraduate architectural environmental or mechanical engineering students

Data-driven BIM for Energy Efficient Building Design Saeed Banihashemi,Hamed Golizadeh,Farzad Pour Rahimian,2022-12-16 This research book aims to conceptualise the scale and spectrum of Building Information Modelling BIM and Artificial Intelligence AI approaches in energy efficient building design and to develop its functional solutions with a focus on four crucial aspects of building envelop building layout occupant behaviour and heating ventilation and air conditioning HVAC systems Drawn from theoretical development on the sustainability informatics and optimisation paradigms in built environment the energy efficient building design will be marked through the power of data and BIM intelligent agents during the design phase It will be further developed via smart derivatives to reach a harmony in the systematic integration of energy efficient building design solutions a gap that is missed in the extant literature and that this book aims to fill This approach will inform a vision for future and provide a framework to shape and respond to our built environment and how it transforms the way we design and build By considering the balance of BIM AI and energy efficient outcomes the future development of buildings will be regenerated in a direction that is sustainable in the long run This book is essential reading for those in the AEC industry as well as computer scientists

Lean Construction Patricia Tzortzopoulos, Mike Kagioglou, Lauri Koskela, 2020-02-26 This book collates the main research developments around Lean Construction over the past 25 years with contributions from many seminal authors in the field It takes stock of developments since the publication of Koskela's 1992 Application of the New Production Philosophy to Construction and in doing so challenges current thinking and progress It also crystallises theoretical conceptualisations and practically situated learning whilst identifying future research challenges agendas and opportunities for global collaborative actions The contributors present the development of Lean Construction as a fundamental part of improving construction productivity quality and delivery of value to clients and users of built infrastructure In doing so the book introduces the reader to the foundational principles and theories that have influenced the way we now understand Lean Construction and has provided very useful insights to students practitioners and researchers on key junctures over the last 25 years Highlighting the key contemporary

developments and using global case study material the chapters demonstrate good practice but also help introduce new thinking to both lay readers and experienced practitioners alike This book is essential reading for undergraduate and postgraduate students researchers and practitioners with an interest in Lean Construction and construction management providing a general understanding of the area current state of the art knowledge as well as providing an insight into areas for future research

Beginning Design Technology Mike Christenson, 2015-12-22 *Beginning Design Technology* introduces how design technologies work together including tools materials and software such as Adobe Photoshop Adobe Illustrator Autodesk AutoCAD and others It teaches you how to think about each design tool whether a software program or physical modelmaking so that you will select one for its strengths for a specific task and know when and how to combine it with other tools Topics include working with building information texturing digital and physical artifacts translating information from one form or file format to another constructing at full scale and making digital and physical models Chapter Summaries exercises discussion questions a glossary an appendix of common software commands and an annotated bibliography will help you find what you need quickly and put the information into practice
