and inservice teachers beliefs and teaching practices Brownlee Schraw and Berthelsen 2011 While we addressed the nature of teachers personal epistemologies learning and teaching practices and approaches for changing beliefs throughout teacher education programs the volume did not address conceptual frameworks for the development of teacher s personal epistemologies To address this gap the book is focused on teacher educators teachers and teacher education programmers in universities with an overall aim of highlighting how we might support preservice teachers involvement in learning that is challenging and inservice teachers engagement in professional experiences that promote changes in teaching practice We argue that teachers need to be encouraged to question their beliefs and develop increasingly sophisticated beliefs about their knowledge and their students knowledge that facilitate learning and intellectual growth *Becoming a Better Science Teacher* Elizabeth Hammerman,2006-06-23 With this simple guide teachers can analyze their existing curriculum and instruction against a rubric of indicators of critical characteristics related standards concept development and teaching strategies to develop students scientific literacy at the highest levels Every chapter includes charts sample lesson ideas reflection and discussion prompts and more to help teachers expand their capacity for success From publisher s description
