

The background of the book cover is an abstract composition of numerous vertical bars of varying heights and colors, including red, orange, yellow, green, blue, and purple. These bars are arranged in a way that creates a sense of depth and movement, resembling a stylized bookshelf or a modern architectural facade.

Agent-Based Modelling in Economics Lynne Hamill, Nigel Gilbert, 2016-01-19 Agent based modelling in economics Lynne Hamill and Nigel Gilbert Centre for Research in Social Simulation CRESS University of Surrey UK New methods of economic modelling have been sought as a result of the global economic downturn in 2008 This unique book highlights the benefits of an agent based modelling ABM approach It demonstrates how ABM can easily handle complexity heterogeneous people households and firms interacting dynamically Unlike traditional methods ABM does not require people or firms to optimise or economic systems to reach equilibrium ABM offers a way to link micro foundations directly to the macro situation Key features Introduces the concept of agent based modelling and shows how it differs from existing approaches Provides a theoretical and methodological rationale for using ABM in economics along with practical advice on how to design and create the models Each chapter starts with a short summary of the relevant economic theory and then shows how to apply ABM Explores both topics covered in basic economics textbooks and current important policy themes unemployment exchange rates banking and environmental issues Describes the models in pseudocode enabling the reader to develop programs in their chosen language Supported by a website featuring the NetLogo models described in the book Agent based Modelling in Economics provides students and researchers with the skills to design implement and analyze agent based models Third year undergraduate master and doctoral students faculty and professional economists will find this book an invaluable resource

International Bibliography of Economics 1998 Compiled by the British Library of Political and Economic Science, 1999-12-16 Renowned for its international coverage and rigorous selection procedures this series provides the most comprehensive and scholarly bibliographic service available in the social sciences Arranged by topic and indexed by author subject and place name each bibliography lists and annotates the most important works published in its field during the year of 1997 including hard to locate journal articles Each volume also includes a complete list of the periodicals consulted **An Introduction to the Green Economy** Adrian C. Newton, Elena Cantarello, 2014-08-13 The green economy is widely seen as a potential solution to current global economic and environmental crises and a potential mechanism by which sustainable development might be achieved in practice Considerable investments are now being made into the development of green technology renewable energy biodiversity conservation resource efficiency recycling of materials and green infrastructure This textbook provides a comprehensive introduction to the green economy using a strongly interdisciplinary approach based on environmental science rather than treating it as a sub set of economics The scientific principles of sustainability are presented which provide the foundations of the green economy with a particular focus on systems based approaches Examples of real world case studies are used to illustrate how the green economy can be achieved in practice In this way the authors provide a thorough overview of both the principles and practice of the green economy drawing from a wide range of disciplines including ecology geography social science psychology sustainability science environmental science law and

economics The emphasis is on presenting results of the latest research derived from leading scientific journals Rather than focusing on a single definition of what constitutes a green economy the book introduces readers to the diversity of opinion that exists and engages them in what is an active on going debate This reflects the fact that many aspects of the green economy and sustainable development more generally are currently contested In particular the book will help readers to strengthen their ability to critically evaluate the evidence for and against the views presented and to actively contribute to the future development of the green economy *Jones and Sufrin's EU Competition Law* Alison Jones,B. E. Sufrin,Niamh Dunne,2019 The most comprehensive resource for students on EU competition law extracts from key cases academic works and legislation are paired with incisive critique and commentary from an expert author team *Housing Policy and Finance* John Black,David Stafford,2013-10-28 This book provides a comprehensive introduction to housing policy and finance in Britain It describes changes in the condition and tenure of housing in the post war period and contrasts the massive investment in house building and improvement with allegations that housing conditions are deteriorating It describes the rise of the public housing sector and the slight decline in the face of the Thatcher government s policy on council house sales which followed The book thus provides a background for the development of housing policy over the next decade

Threshold Concepts within the Disciplines ,2008-01-01 Threshold Concepts within the Disciplines brings together leading writers from various disciplines and national contexts in an important and readable volume for all those concerned with teaching and learning in higher education The foundational principle of threshold concepts is that there are in each discipline conceptual gateways or portals that must be negotiated to arrive at important new understandings In crossing the portal transformation occurs both in knowledge and subjectivity Such transformation involves troublesome knowledge a key concern for contributors to this book who identify threshold concepts in their own fields and suggest how to deal with them Part One extends and enhances the threshold concept framework containing chapters that articulate its qualities its links to other social theories of learning and other traditions in educational research Part Two encompasses the disciplinary heart of the book with contributions from a diversity of areas including computing engineering biology design modern languages education and economics In the many empirical case studies educators show how they have used the threshold concept framework to inform and evaluate their teaching contexts Other chapters emphasise the equally important being and becoming dimension of learning Part Three suggests pedagogic directions for those at the centre of the education project with contributions focusing on the socialisation of academics and their continuing quest to be effective teachers The book will be of interest to disciplinary teachers educational researchers and educational developers It also is of relevance to issues in quality assurance and professional accreditation Unemployment in Capitalist, Communist and Post-Communist Economies J. Porket,1995-04-03 No modern economy can escape open unemployment as long as free labour and a free labour market exist In any modern economy there exists a tension between economic individualism and economic collectivism but

market forces cannot forever be denied While Part 1 examines open and hidden unemployment in capitalist market economies and socialist command economies prior to 1989 Part 2 concentrates on the issue of unemployment in post communist economies between 1989 and the end of 1993 Finally Part 3 summarizes re examines and expands on those selected dimensions of the issue of unemployment that are deemed currently to be relevant to both Western and post communist economies Although the book is primarily about unemployment open as well as hidden it also is about economic systems and their transformation and hence about the role of the state in the economy

Introduction to Environmental Economics Nick Hanley, Jason Shogren, Ben White, Benedict White, 2013-01-31 Part one explains the fundamental economic concepts

The Metaphysics of Capitalism Andrea Micocci, 2009-01-16 The objective of this book is to construct an individually emancipatory economic and political philosophy This means a concrete based man centered non hypostatizing anti dialectical approach to the apprehension of the material i e nature in general This constitutes an emancipation from culture based understandings of reality and in particular from the metaphysically biased type of culture represented by capitalism The proposed philosophical emancipation means individual liberation from the logically flawed massifying character of the dominant mode of thought of capitalist times From these bases the social sciences can also be reformulated Micocci argues that capitalism can be conceptualized as a limited and limiting socialized mode of thought an intellectuality whose dialectical features are effectively identified by using the proxy of political economy both marxist and mainstream Political economy in fact being a most representative instance of dialectical thinking mirrors the dialectical nature of capitalist economic and political relationships According to Micocci non dialectical occurrences in capitalism are simply excluded from normal social economic and intellectual activities which are performed in a metaphysical intellectually isolated environment In capitalism therefore the materials the concrete i e nature itself is not considered as a whole but only as occasional instances Micocci describes capitalism in sum as an intellectually constructed culture a metaphysics which preserves itself and props itself up by means of its iterative market like functioning
