Computer Programming in C for Beginners Avelino J. Gonzalez, 2020-11-01 This textbook is an ideal introduction in college courses or self study for learning computer programming using the C language Written for those with minimal or no programming experience Computer Programming in C for Beginners offers a heavily guided hands on approach that enables the reader to quickly start programming and then progresses to cover the major concepts of C programming that are critical for an early stage programmer to know and understand While the progression of topics is conventional their treatment is

innovative and designed for rapid understanding of the many concepts in C that have traditionally proven difficult for beginners such as variable typing and scope function definition passing by value pointers passing by reference arrays structures basic memory management dynamic memory allocation and linked lists as well as an introductory treatment of searching and sorting algorithms Written in an informal but clear narrative the book uses extensive examples throughout and provides detailed guidance on how to write the C code to achieve the objectives of the example problems Derived from the author's many years of teaching hands on college courses it encourages the reader to follow along by programming the progressively more complex exercise programs presented In some sections errors are purposely inserted into the code to teach the reader about the common pitfalls of programming in general and the C language in particular
