

Chapter 1 Guided Reading Assignment

1. What are science, science theory, and why is it important in biology?
 Theology (belief in religious or supernatural powers for behavior/beliefs) has nothing to do with science. Science is a process. It is important in biology because understanding our biology can drive social and technological change for our society/better informed observations.
2. What does an organism's surroundings mean, and what is the difference between its anatomy and its phenotype? Describe the difference.
 An organism's surroundings are all the things it interacts with. The difference between anatomy and phenotype is that anatomy is the internal structure of an organism, while phenotype is the external appearance of an organism.
3. Describe the process and purpose of natural selection.
 Natural selection is the process by which organisms with favorable traits survive and reproduce, passing those traits on to their offspring. This leads to the gradual change in the traits of a population over time.
4. Explain the concepts of cell theory – all organisms are made of cells.

5. What is a tissue, and how is it different from an organ? Explain the difference.
6. List each of the four types of tissues – name the specific structures and the function of the structure or each of the organs. The important concept is to make sure the specific structures listed for the specific function for the organ/organism.
