Atlas Atlas Series 1:

National Library of Medicine Audiovisuals Catalog National Library of Medicine (U.S.), **Tarnished Victory** William Marvel, 2017-11-01 A full and insightful account of the Civil War's final year from the award winning author of *Lee's Last Retreat* Publishers Weekly Beginning with the Virginia and Atlanta campaigns of May 1864 and closing with the final surrender of Confederate forces in June 1865 *Tarnished Victory* follows the course of the Civil War's final year As the death toll rises with each bloody battle the home front is devastated and the nation suffers incredible losses on both sides of the political divide Victory in the North required great sacrifice and here first rate scholar William Marvel considers what that sacrifice was worth in the aftermath of 1865 as Abraham Lincoln's political heirs failed to carry through on the occupation of the South resulting in a tarnished victory Booklist Just as he did in *Mr Lincoln Goes to War* Lincoln's Darkest Year and *The Great Task Remaining* the prize winning historian has drawn on personal letters newspaper articles of the time and official documents and records to create an illuminating work of revisionist history that ultimately considers the true cost of Lincoln's war *The Great Task Remaining* William Marvel, 2010-06-22 Focusing on the dramatic events of 1863 this is a well researched and well written study that will be a fine addition to Civil War collections Booklist *The Great Task Remaining* is a striking often poignant portrait of people in conflict not only in battles between North and South but within and among themselves as the cost of the ongoing carnage sometimes seemed too much to bear As 1863 unfolds we see draft riots in New York the disaster at Chancellorsville the battle of Gettysburg and the end of the siege of Vicksburg Then astonishingly the Confederacy springs vigorously back to life after the Union summer triumphs setting the stage for Lincoln's now famous speech on the Pennsylvania battlefield Without abandoning the underlying sympathy for Lincoln William Marvel makes a convincing argument for the Gettysburg Address as being less of a paean to liberty than an appeal to stay the course in the face of rampant antiwar sentiment This book offers a provocative history of a dramatic year a year that saw victory and defeat doubt and riot as well as a compelling story of a people who clung to the promise of a much longed for end By 1863 Northern citizens and soldiers were increasingly and openly wondering whether preserving the union and ending slavery were worth the cost of Mr Lincoln's war Disillusion and war weariness had set in the war's only fruits seemed to be moral and political degradation dangerous constitutional precedents tens of thousands dead and maimed The Battle of Chickamauga appeared to have restored the stalemate Marvel particularly conveys the looming crisis of the impending expiration of the three year enlistments that were the Union army's norm That combined with the increasing reluctance of Northern men to volunteer or send their sons could have ended the war by default Romance and adventure or misery and peril which emotions would prevail As Marvel conclusively demonstrates the coin remained in the air as 1863 came to an end Publishers Weekly **Monthly Catalogue, United States Public Documents**, 1991-03 *Cartography Past, Present and Future* D.W. Rhind, D.R. Fraser Taylor, 2013-10-22 Making maps dates back at least four thousand years and it is widely

recognised that many maps are of great historical value and present a skilled method of summarising the real world on a sheet of paper Less well known is the judgement involved in the selection and simplification of features the complex transformation of space and the exacting standards which are needed in cartography This book is primarily a tribute to Professor F J Ormeling former President and Secretary Treasurer of the ICA and gives a wide ranging review of the current status of cartography how this status was attained and the way in which the subject is expected to evolve over the next decade It is composed of two main sections In the first the present state of cartography in different countries is examined The second section is a thematic view in which some of the major issues and developments in cartography are discussed in turn including art and science in cartography the character of historical cartography the role of map making in developing countries the impact of a possible ideal computer mapping facility and how cartography has changed in recent years There are international contributions from authors distinguished and internationally recognised in cartography and related fields and who have had a significant input to the ICA *Selected Articles from Data User News, 1971 - March 1978* United States.
