An Atlas of Extinct Countries Gideon Defoe, 2021-06-08 Prisoners of Geography meets Bill Bryson a funny fascinating beautifully illustrated and timely history of countries that for myriad and often ludicrous reasons no longer exist Countries are just daft stories we tell each other They're all equally implausible once you get up close Countries die Sometimes it's murder sometimes it's by accident and sometimes it's because they were so ludicrous they didn't deserve to exist in the first place Occasionally they explode violently A few slip away almost unnoticed Often the cause of death is either got too greedy or Napoleon turned up Now and then they just hold a referendum and vote themselves out of existence This is an atlas of 48 nations that fell off the map The polite way of writing an obituary is dwell on the good bits gloss over the embarrassing stuff This book refuses to do so because these dead nations are so full of schemers racists and con men that it's impossible to skip the embarrassing stuff Because of this and because treating nation states with too much reverence is the entire problem with pretty much everything these accounts are not concerned with adding to the earnest flag saluting in the world however nice some of the flags might be

The Conservation Atlas of Tropical Forests Jeffrey

Sayer, 1992-06-18 Recognizing that sound information is vital to the progress of conservation IUCN have gathered together a visual portfolio of maps of rain forests in Africa The accompanying text analyzes the extent and causes of deforestation and points a way towards sustainable forest development **Absence of God in America, Absence of God in Us** Lara Applebee Powell, 2006-06 **Postcards** Lydia Pyne, 2021-10-13 A global exploration of postcards as artifacts at the intersection of history science technology art and culture Postcards are usually associated with banal holiday pleasantries but they are made possible by sophisticated industries and institutions from printers to postal services When they were invented postcards established what is now taken for granted in modern times the ability to send and receive messages around the world easily and inexpensively Fundamentally they are about creating personal connections links between people places and beliefs Lydia Pyne examines postcards on a global scale to understand them as artifacts that are at the intersection of history science technology art and culture In doing so she shows how postcards were the first global social network and also here in the twenty first century how postcards are not yet extinct **The Physical Atlas of Natural Phenomena** Alexander Keith Johnston, 1850 **Report** India. Indian Survey Committee, 1904-05, 1905 The Atlas of World Hunger Thomas J. Bassett, Alex Winter-Nelson, 2010-05-15 Earlier this year President Obama declared one of his top priorities to be making sure that people are able to get enough to eat The United States spends about five billion dollars on food aid and related programs each year but still both domestically and internationally millions of people are hungry In 2006 the Food and Agricultural Organization of the United Nations counted 850 million hungry people worldwide but as food prices soared an additional 100 million or more who were vulnerable succumbed to food insecurity If hunger were simply a matter of food production no one would go without There is more than enough food produced annually to provide every living person with a healthy diet yet so many suffer from food shortages unsafe water and malnutrition every year That's because hunger is a complex political economic and ecological phenomenon The interplay of these forces produces a geography of hunger that Thomas J Bassett and Alex Winter Nelson illuminate in this empowering book The Atlas of World Hunger uses a conceptual framework informed by geography and agricultural economics to present a hunger index that combines food availability household access and nutritional outcomes into a single tool one that delivers a fuller understanding of the scope of global hunger its underlying mechanisms and the ways in which the goals for ending hunger can be achieved The first depiction of the geography of hunger worldwide the Atlas will be an important resource for teachers students and anyone else interested in understanding the geography and causes of hunger This knowledge the authors argue is a critical first step toward eliminating unnecessary suffering in a world of plenty
