Atmospheric Pollution History Science And Regulation:

Atmospheric Pollution Mark Z. Jacobson, 2002-09-05 Publisher Description **Atmospheric Pollution** Mark Z. Jacobson, 2002-09-05 This book provides a comprehensive introduction to the history and science of major air pollution issues. It begins with an introduction to the basic atmospheric chemistry and the history of discovery of chemicals in the atmosphere and then moves on to a discussion of the evolution of the earth's atmosphere and the structure and composition of the present day atmosphere. It also offers a comprehensive and accessible discussion of the five major atmospheric pollution topics: urban outdoor air pollution, indoor air pollution, acid deposition, stratospheric ozone reduction, and global climate change.

Atmospheric Pollution Mark Zachary Jacobson, 2002 **Fundamentals of Atmospheric Modeling** Mark Z. Jacobson, 1999 Comprehensive graduate text describing the atmospheric processes, numerical methods, and computational techniques needed for those studying air pollution and meteorology.

World Atlas of Atmospheric Pollution Ranjeet S. Sokhi, 2011-08-01 Air pollution affects us all in a number of crucial ways, causing lasting damage to our health and our environment. While primary pollution can result from local activities, the extent of the impact can be felt at spatial scales from the individual up to the whole planet and temporal scales from minutes to decades. Consequently, pollution of our atmosphere remains a critical concern, warranting continued scientific investigation and the development of effective local and global solutions. The World Atlas of Atmospheric Pollution clearly and engagingly summarises current understanding of the state of air pollution on city to global scales.

Air Pollution and Global Warming Mark Z. Jacobson, 2012-04-23 New edition of introductory textbook ideal for students taking a course on air pollution and global warming whatever their background. Comprehensive introduction to the history and science of the major air pollution and climate problems facing the world today as well as energy and policy solutions to those problems.

Air Pollution Jeremy Colls, Abhishek Tiwary, 2017-07-12 A one stop comprehensive textbook covering the three essential components of air pollution science. The Third Edition has been updated with the latest developments, especially the inclusion of new information on the role of air pollutants in climate change. The authors give greater coverage to the developing economies around the world where air pollution problems are on the rise. The Third Edition continues to cover a wide range of air quality issues, retaining a quantitative perspective. Topics covered include gaseous and particulate air pollutants, measurement techniques, meteorology, and dispersion modelling; mobile sources; indoor air effects on plants, materials, humans, and animals. Moving away from classical toxic air pollutants, there is a chapter on climate change and another on the depletion of stratospheric ozone. A special feature of this new edition is the inclusion of a fresh chapter on air pollution mitigation by vegetation, mainly its role in maintaining a sustainable urban environment. Recommended for upper level undergraduate and postgraduate courses specialising in air pollution, both for environmental scientists and engineers. The new material included in the Third Edition extends its use by practitioners in consultancies or local authorities.

Air Pollution Abhishek Tiwary, Ian Williams, 2018-07-04 This established textbook

offers a one stop comprehensive coverage of air pollution all in an easy reading and accessible style The fourth edition broadly updated and developed throughout includes a brand new chapter providing a broader overview to the topic for general reading and presents fresh materials on air pollution modelling mitigation and control tailored to the needs of both amateur and specialist users Retaining a quantitative perspective the covered topics include gaseous and particulate air pollutants measurement techniques meteorology and modelling area sources mobile sources indoor air effects on plants materials humans and animals impact on climate change and ozone profiles and air quality legislations This edition also includes a final chapter covering a suite of sampling and laboratory practical experiments that can be used for either classroom teachings or as part of research projects As with previous editions the book is aimed to serve as a useful reading resource for upper level undergraduate and postgraduate courses specialising in air pollution with dedicated case studies at the end of each chapter as well as a list of revision questions provided at the end as a complementary section

The Basic Environmental History Mauro Agnoletti, Simone Neri Serneri, 2014-10-15 This book is an introductory instrument to the main themes of environmental history illustrating its development over time methodological implications results achieved and those still under discussion But the overriding aspiration is to show that the doubts methods and knowledge elaborated by environmental history have a heuristic value that is far from negligible precisely in its attitude to the most consolidated major historiography For this reason this book gives an overview of environmental history as it is an essential component of the basic knowledge of global history At the same time it introduces specific aspects which are useful both for anyone wanting to deepen his her studies of environmental historiography and for those interested in one of the many disciplinary areas from rural history to urban history from the history of technology to the history of public health etc with which environmental history develops a dialogue
