Beginning Mapserver Open Source Gis Development Experts Voice In Open Source:

Beginning MapServer Bill Kropla, 2006-11-05 *Beginning MapServer Open Source GIS Development* is the first book of its kind. It offers a comprehensive introduction to MapServer, the development platform for integrating mapping technology into Internet applications. You'll learn how to build and extend dynamic applications using popular languages like PHP, Perl, and Python. After a thorough introduction to installation and configuration, you'll uncover basic MapServer topics and examples. You'll also learn about advanced MapServer features and how to query and incorporate dynamic data into your application. The book culminates with the creation of an actual mapping application.

Open Source GIS: A GRASS GIS Approach Markus Neteler, Helena Mitsova, 2008-01-17 Since the first edition of *Open Source GIS: A GRASS GIS Approach* was published in 2002, GRASS has undergone major improvements. This second edition includes numerous updates related to the new development; its text is based on the GRASS 5.3 version from December 2003. Besides changes related to GRASS 5.3 enhancements, the introductory chapters have been reorganized, providing more extensive information on import of external data. Most of the improvements in technical accuracy and clarity were based on valuable feedback from readers. *Open Source GIS: A GRASS GIS Approach, Second Edition* provides updated information about the use of GRASS, including geospatial modeling with raster, vector, and site data; image processing; visualization; and coupling with other open source tools for geostatistical analysis and web applications. A brief introduction to programming within GRASS encourages new development. The sample data set used throughout the book has been updated and is available on the GRASS web site. This book also includes links to sites where the GRASS software and online reference manuals can be downloaded, and additional applications can be viewed.

Open Source Approaches in Spatial Data Handling Brent Hall, Michael G. Leahy, 2008-09-27 The role open source geospatial software plays in data handling within the spatial information technology industry is the overarching theme of the book. It also examines new tools and applications for those already using OS approaches to software development.

Web Mapping Illustrated Tyler Mitchell, 2005-06-17 With the help of the Internet and accompanying tools, creating and publishing online maps has become easier and richer with options. A city guide web site can use maps to show the location of restaurants, museums, and art venues. A business can post a map for reaching its offices. The state government can present a map showing average income by area. Developers who want to publish maps on the web often discover that commercial tools cost too much, and hunting down the free tools scattered across the Internet can use up too much of your time and resources. *Web Mapping Illustrated* shows you how to create maps, even interactive maps, with free tools including MapServer, OpenEV, GDAL, OGR, and PostGIS. It also explains how to find, collect, understand, use, and share mapping data, both over the traditional Web and using OGC standard services like WFS and WMS. Mapping is a growing field that goes beyond collecting and analyzing GIS data. *Web Mapping Illustrated* shows how to combine free geographic data, GPS, and data management tools into one resource for your mapping information needs, so you don't have to lose your way.
