Numbers and Computers Ronald T. Kneusel, 2017-02-09 This is a book about numbers and how those numbers are represented in and operated on by computers. It is crucial that developers understand this area because the numerical operations allowed by computers and the limitations of those operations especially in the area of floating point math affect virtually everything people try to do with computers. This book aims to fill this gap by exploring in sufficient but not overwhelming detail just what it is that computers do with numbers. Divided into two parts, the first deals with standard representations of integers and floating point numbers while the second examines several other number representations. Details are explained thoroughly with clarity and specificity. Each chapter ends with a summary, recommendations, carefully selected references, and exercises to review the key points. Topics covered include interval arithmetic, fixed point numbers, big integers, and rational arithmetic. This new edition has three new chapters: Pitfalls of Floating Point Numbers and How to Avoid Them, Arbitrary Precision Floating Point, and Other Number Systems. This book is for anyone who develops software, including software engineers, scientists, computer science students, engineering students, and anyone who programs for fun.

Programming Language Implementation and Logic Programming Jan Małuszyński, Martin Wirsing, 1991-08-14 This volume contains the papers which have been accepted for presentation at the Third International Symposium on Programming Language Implementation and Logic Programming (PLILP 91) held in Passau, Germany, August 26-28, 1991. The aim of the symposium was to explore new declarative concepts, methods, and techniques relevant for the implementation of all kinds of programming languages, whether algorithmic or declarative ones. The intention was to gather researchers from the fields of algorithmic programming languages as well as logic, functional, and object-oriented programming. This volume contains the two invited talks given at the symposium by H. Ait Kaci and D. B. MacQueen, 32 selected papers, and abstracts of several system demonstrations. The proceedings of PLILP 88 and PLILP 90 are available as Lecture Notes in Computer Science Volumes 348 and 456.
