

Illustrated behavioural mapping

Behavioural mapping in Sofia

CHALLENGES ADDRESSED

Behavioural mapping is structured observation combining different techniques for documentation, mapping and counting of activities performed by people moving and occupying a defined space in chosen moments of time. It helps to explore the quantity and the quality of various activities performed at the place observed, the non-motorised moving, staying, recreating or playing. The process of gathering of data through observations and data analysis and visualisation can reveal the ways of presence of different targeted groups in the study area and their behaviour. This information can present overall pictures of health, wellbeing, socialisation, time budget and physical activity. The results can provide in-depth knowledge of the users' dynamics at specified locations as input for urban regeneration, decisions, planning and design of healthy conditions and implementation of place oriented NBSs.

DESCRIPTION

PARTICIPATION PROCESS

CO-DIAGNOSTIC

Very relevant for the in-depth understanding and communication of performed activities, usual or extraordinary behaviour observed in a public space.

CO-SELECTION

Particularly relevant for the informed selection of solutions more suitable to the public life which adapted to the existing environment and was collected in time.

CO-DESIGN

Particularly relevant for preliminary evaluation of the impact from planned and designed interventions. Also relevant for the involvement of volunteers from the community to help them to understand places beyond their routine.

CO-IMPLEMENTATION

Can be relevant if included between phases of implementation and as part of tactics for gradually existing design and evolution, step by step.

CO-MONITORING

Particularly relevant to emerging issues during monitoring for the improvement of implemented solutions and the overall evaluation of the transformation of public life, pattern of old and new activities, changes in the behaviour of users.

INNOVATION ASPECT

- Non-participant observation method with the help of new information and communication technologies for documenting and mapping;
- Can reveal important patterns in public space use with the help of various cartographic and other methods for visualisation;

REPLICATION AND SCALABILITY

- Easy replicable in smaller scope and useful in diverse places of interest;
- Quality of replication relates to initial preparation, instructions, motivation and potential use of suitable hardware;
- Processing and visualisation of data through GIS, illustration and printout design techniques possible with the help of free and open source software.

BEST PRACTICES and REFERENCES

LEADS

Gehl collaborated with the J. Mox Gould Center for a study of public life and urban justice in New York City in 2015. Gehl Architects included behavioural mapping in a report for the historical centre of Sofia in 2017. It was provided by two demonstration projects of the Urban Bulgarian Spatial Patterns - Shops, the Neighborhood and Urban Standards. More information

Behavioural Mapping Guide

David Kirk

Behavioural Mapping Guide:

A Practical Guide to Behavioral Research Barbara Baker Sommer, Robert Sommer, 1991 The fifth edition of this popular research methods book emphasizes a hands on multimethod interdisciplinary approach to behavioral research In this book research is seen not as a remote activity of a white coat priesthood but as an approach that can be used by people in many fields to solve immediate problems and increase understanding of human behavior Numerous examples from different nations are provided throughout

Tools and Ethics for Applied Behavioural Insights: The BASIC Toolkit

OECD, 2019-06-18 Behavioural insights BI are lessons derived from the behavioural and social sciences including decision making psychology cognitive science neuroscience organisational and group behaviour

A Practical Guide to Cluster

Randomised Trials in Health Services Research Sandra Eldridge, Sally Kerry, 2012-01-09 Cluster randomised trials are trials in which groups or clusters of individuals are randomly allocated to different forms of treatment In health care these trials often compare different ways of managing a disease or promoting healthy living in contrast to conventional randomised trials which randomise individuals to different treatments classically comparing new drugs with a placebo They are increasingly common in health services research This book addresses the statistical practical and ethical issues arising from allocating groups of individuals or clusters to different interventions Key features Guides readers through the stages of conducting a trial from recruitment to reporting Presents a wide range of examples with particular emphasis on trials in health services research and primary care with both principles and techniques explained Topics are specifically presented in the order in which investigators think about issues when they are designing a trial Combines information on the latest developments in the field together with a practical guide to the design and implementation of cluster randomised trials Explains principles and techniques through numerous examples including many from the authors own experience Includes a wide range of references for those who wish to read further This book is intended as a practical guide written for researchers from the health professions including doctors psychologists and allied health professionals as well as statisticians involved in the design execution analysis and reporting of cluster randomised trials Those with a more general interest will find the plentiful examples illuminating

Lesion-to-Symptom Mapping Dorian Pustina, Daniel Mirman, 2022-06-07 Recent developments in lesion symptom mapping LSM have spurred rapid growth This volume provides comprehensive coverage of the steps and considerations involved in LSM The chapters cover the definition and types of brain lesions how to prepare them for analysis standard LSM methods network based LSM methods and approaches of transient lesions induced by brain stimulation These chapters are supplemented by practical hands on mini tutorials on implementing the different analyses using freely available software In the Neuromethods series style chapters include the kind of detail and key advice from the specialists needed to get started using LSM in your laboratory Cutting edge and thorough Lesion to Symptom Mapping Principles and Tools connects core conceptual issues with available tools making it a valuable resource for experienced and

new researchers **Clinician's Handbook of Adult Behavioral Assessment** Michel Hersen,2011-04-28 Given the vast amount of research related to behavioral assessment it is difficult for clinicians to keep abreast of new developments In recent years there have been advances in assessment case conceptualization treatment planning treatment strategies for specific disorders and considerations of new ethical and legal issues Keeping track of advances requires monitoring diverse resources limited to specific disorders many of which are theoretical rather than practical or that offer clinical advice without providing the evidence base for treatment recommendations This handbook was created to fill this gap summarizing critical information for adult behavioral assessment The Clinician s Handbook of Adult Behavioral Assessment provides a single source for understanding new developments in this field cutting across strategies techniques and disorders Assessment strategies are presented in context with the research behind those strategies along with discussions of clinical utility and how assessment and conceptualization fit in with treatment planning The volume is organized in three sections beginning with general issues followed by evaluations of specific disorders and problems and closing with special issues To ensure cross chapter consistency in the coverage of disorders these chapters are formatted to contain an introduction assessment strategies research basis clinical utility conceptualization and treatment planning a case study and summary Special issue coverage includes computerized assessment evaluating older adults behavioral neuropsychology ethical legal issues work related issues and value change in adults with acquired disabilities Suitable for beginning and established clinicians in practice this handbook will provide a ready reference toward effective adult behavioral assessment [Guidelines for sustainable tick control and acaricide resistance management in livestock](#) Food and Agriculture Organization of the United Nations,2025-05-23 These guidelines offer a comprehensive resource for managing tick control and tackling acaricide resistance in livestock They emphasize the growing problem of acaricide resistance which has been observed in various regions The document provides in depth information on tick biology available synthetic chemical controls and the underlying mechanisms of acaricide resistance It stresses the importance of continuously monitoring tick populations and resistance levels to inform more effective control strategies To address this resistance the guidelines recommend Integrated Tick Management ITM a holistic approach that integrates chemical treatments with non chemical methods This strategy aims to reduce acaricide use helping to slow resistance development and minimize potential environmental and public health risks Additionally the guidelines highlight the necessity of strong regulatory frameworks to ensure the quality safety and effectiveness of tick control products In conclusion these guidelines deliver a thorough overview of the challenges and strategies related to tick control and acaricide resistance advocating for sustainable practices and ongoing research to improve livestock health and productivity while reducing the risks posed by tick infestations and the diseases they transmit
 The Routledge Handbook of Designing Public Spaces for Young People Janet Loebach,Sarah Little,Adina Cox,Patsy Eubanks Owens,2020-06-03 The Routledge Handbook of Designing Public Spaces for Young People is a thorough and

practical resource for all who wish to influence policy and design decisions in order to increase young people's access to and use of public spaces as well as their role in design and decision making processes. The ability of youth to freely enjoy public spaces and to develop a sense of belonging and attachment to these environments is critical for their physical, social, cognitive and emotional development. Young people represent a vital citizen group with legitimate rights to occupy and shape their public environments yet they are often driven out of public places by adult users' restrictive bylaws or hostile designs. It is also important that children and youth have the opportunity to genuinely participate in the planning of public spaces and to have their needs considered in the design of the public realm. This book provides both evidence and tools to help effectively advocate for more youth inclusive public environments as well as integrate youth directly into both research and design processes related to the public realm. It is essential reading for researchers, design and planning professionals, community leaders and youth advocates.

Guidance on spatial wildland fire analysis Richard D. Stratton, 2006

The Handbook of Behavior Change Martin S. Hagger, Linda D. Cameron, Kyra Hamilton, Nelli Hankonen, Taru Lintunen, 2020-07-23

Social problems in many domains including health, education, social relationships and the workplace have their origins in human behavior. The documented links between behavior and social problems have compelled governments and organizations to prioritize and mobilize efforts to develop effective evidence-based means to promote adaptive behavior change. In recognition of this impetus, *The Handbook of Behavior Change* provides comprehensive coverage of contemporary theory, research and practice on behavior change. It summarizes current evidence-based approaches to behavior change in chapters authored by leading theorists, researchers and practitioners from multiple disciplines including psychology, sociology, behavioral science, economics, philosophy and implementation science. It is the go-to resource for researchers, students, practitioners and policy makers looking for current knowledge on behavior change and guidance on how to develop effective interventions to change behavior.

Handbook Of Spatial Research Paradigms And Methodologies Nigel Foreman, Raphael Gillett, 2013-01-11

Spatial cognition is a broad field of enquiry emerging from a wide range of disciplines and incorporating a wide variety of paradigms that have been employed with human and animal subjects. This volume is part of a two-volume handbook reviewing the major paradigms used in each of the contributors' research areas. This volume considers the issues of neurophysiological aspects of spatial cognition, the assessment of cognitive spatial deficits arising from neural damage in humans and animals and the observation of spatial behaviours in animals in their natural habitats. This handbook should be of interest to new and old students alike. The student new to spatial research can be brought up to speed with a particular range of techniques, made aware of the background and pitfalls of particular approaches and directed toward useful sources. For seasoned researchers, the handbook provides a rapid scan of the available tools that they might wish to consider as alternatives when wishing to answer a particular spatial research problem.

This Enthralling Realm of E-book Books: A Detailed Guide Revealing the Pros of Kindle Books: A World of Ease and Flexibility
