ascent of Denali Excerpted in Vanity Fair Rolling Stone and Men s Journal and named one of the most noteworthy books of the month by the Washington Post Cassidy Randall draws on extensive archival research and original interviews to tell an engrossing edge of the seat adventure story about a forgotten group of climbers who had the audacity to believe that women could walk alone in extraordinary and treacherous heights Grace Hoeman dreamed of standing on top of Denali The tallest peak in North America the fierce polar mountain loomed large in many climbers imaginations and Grace a doctor in Alaska had come close to the top only to be turned back by altitude sickness and a storm that took the lives of seven fellow climbers in one remorseless blow Other expeditions denied her a place because of her gender and when a letter arrived from a climber in California named Arlene Blum who d also been barred from expeditions unless she stayed in base camp and cooked for the men Grace got a defiant idea she would organize and lead the first ever all female ascent of the frozen Alaskan peak Everyone told the Denali Damsels as the team called themselves that it couldn t be done Women were incapable of climbing mountains on their own Men had walked on the moon women still had not stood on the highest points on Earth But these six women were unwilling to be limited by sexists and misogynists They pushed past barriers in society at large the climbing world and their own bodies And then when disaster struck at the worst time on their expedition they could either keep their wits and prove their mettle or die and confirm the worst opinions of men

The American Adrenaline

Narrative Kristin J. Jacobson, 2020-06-01 The American Adrenaline Narrative considers the nature of perilous outdoor adventure tales their gendered biases and how they simultaneously promote and hinder ecological sustainability To explore these themes Kristin J Jacobson defines and compares adrenaline narratives by a range of American authors published after the first Earth Day in 1970 a time frame selected as a watershed moment for the contemporary American environmental movement The forty plus years since that day also mark the rise in the popularity and marketing of many things as extreme including sports jobs travel beverages gum makeovers laundry detergent and even the environmental movement itself Jacobson maps the American eco imagination via adrenaline narratives grounding them in the traditional literary practice of close reading analysis and in ecofeminism She surveys a range of popular and lesser known primary texts by American authors including best selling books such as Jon Krakauer s Into Thin Air and Aron Ralston s Between a Rock and a Hard Place and lesser known texts such as Patricia C McCairen s Canyon Solitude Eddy L Harris s Mississippi Solo and Stacy Allison s Beyond the Limits She also discusses such narratives as they appear in print and online articles and magazines feature length and short films television shows amateur videos social networking site posts fiction advertising and blogs Jacobson contends that these stories constitute a distinctive genre because unlike traditional nature travel and sports writing adrenaline narratives sustain heightened risk or the element of the extreme within a natural setting Additionally these narratives provide important insight into the American environmental imagination s connection to masculinity and adventure knowledge that helps us grasp the current climate crisis and how narrative understanding provides a needed intervention
