To Fix Or To Heal Joseph E. Davis, Ana Marta Gonzalez, 2016-02-26 Do doctors fix patients Or do they heal them For all of modern medicine s many successes discontent with the quality of patient care has combined with a host of new developments from aging populations to the resurgence of infectious diseases which challenge medicine s overreliance on narrowly mechanistic and technical methods of explanation and intervention or fixing patients The need for a better balance for more humane healing rationales and practices that attend to the social and environmental aspects of health and illness and the experiencing person is more urgent than ever Yet in public health and bioethics the fields best positioned to offer countervailing values and orientations the dominant approaches largely extend and reinforce the reductionism and individualism of biomedicine The collected essays in *To Fix or To Heal* do more than document the persistence of reductionist approaches and the attendant extension of medicalization to more and more aspects of our lives The contributors also shed valuable light on why reductionism has persisted and why more holistic models incorporating social and environmental factors have gained so little traction The contributors examine the moral appeal of reductionism the larger rationalist dream of technological mastery the growing valuation of health and the enshrining of individual responsibility as the seemingly non coercive means of intervention and control This paradigm challenging volume advances new lines of criticism of our dominant medical regime even while proposing ways of bringing medical practice bioethics and public health more closely into line with their original goals Precisely because of the centrality of the biomedical approach to our society the contributors argue challenging the reductionist model and its ever widening effects is perhaps the best way to press for a much needed renewal of our ethical and political discourse

A History of Psychology in Western Civilization Bruce K. Alexander, Curtis P. Shelton, 2014-07-03 This book is a re introduction to psychology It focuses on great scholarly thinkers beginning with Plato Marcus Aurelius and St Augustine who gave the field its foundational ideas long before better known founders such as Galton Fechner Wundt and Watson appeared on the scene Psychology can only achieve

its full breadth and potential when we fully appreciate its scholarly legacy Bruce Alexander and Curtis Shelton also argue that the fundamental contradictions built into psychology's history have never been resolved and that a truly pragmatic approach as defined by William James can produce a layered psychology that will enable psychologists to face the fearsome challenges of the twenty first century A History of Psychology in Western Civilization claims that contemporary psychology has overemphasized the methods of physical science and that psychology will need a broader scientific orientation alongside a scholarly focus in order to fully engage the future

Narratives of Addiction Kevin McCarron, 2022-01-03 Narratives of Addiction Savage Usury is the first book to argue in the face of more than a century's received wisdom that drug addiction and alcoholism are undoubtedly evidence of individual moral flaws However the sense of morality that underlies this book is completely severed from Christianity Instead it is influenced in particular by the writings of the nineteenth century German philosophers Arthur Schopenhauer and Frederick Nietzsche both of whom insisted that a genuine morality was actually incompatible with Christianity The sequence of chapters moves from addictions on the streets into rehab clinics and finally into the meetings of Alcoholics Anonymous and Narcotics Anonymous This is the first book to argue that the search for pleasure drives alcoholism and drug addiction and not the numbing of pain Throughout the book I reject the claims of the medical profession as embodied by the American Medical Association that drug addiction and alcoholism are diseases and further argue that they do not have the authority to tell hundreds of millions of Americans that addiction is not a moral failing I also query throughout the book the claims of neuroscience psychology and the social sciences that addictions to alcohol and drugs are attributable to causes that their specific disciplines are best suited to understand I argue that there is nothing complex about addiction it is a simple behavioural disorder The language routinely employed to discuss addiction is similarly not complex just confused and so it is also the rhetoric of addiction discourse especially its use of simile metaphor and euphemism that this book evaluates
