America Needs Talent Attracting Educating Deploying The 21st Century Workforce:

America Needs Talent Jamie Merisotis, 2020-10-01 The author of *Human Work in the Age of Smart Machines* presents a sharp timely blueprint for unleashing the potential of millions of Americans Bruce Kats Founding Director of the Brookings Metropolitan Policy Program The president and CEO of Lumina Foundation Jamie Merisotis is a leading voice in philanthropy higher education and public policy In *America Needs Talent* he explains the choices that must be made on all levels in government education and the private sector as well as by individuals to usher in a new era of success and innovation in America What if you paid for education based on what you actually learned instead of the time you spent in class What if visa applicants were treated like potential assets to our nation's talent pool rather than potential threats monitored by Homeland Security Merisotis proposes bold ideas to successfully deploy the world's most talented people revitalize urban hubs encourage private sector innovation and power America's knowledge economy in the 21st century *America Needs Talent* Jamie Merisotis, 2015 With falling wages and rising inequality persistent unemployment failing schools and broken cities have America's best days come and gone In *America Needs Talent* Jamie Merisotis a globally recognized leader in philanthropy higher education and public policy explains why talent is needed to usher in a new era of innovation and success and why deliberate choices must be made by government the private sector education and individuals to grow talent in America What if you paid for education based on what you actually learned instead of the time you spent in class What if your visa application was processed as if you were an asset to our nation's growing talent pool instead of by Homeland Security Merisotis proposes bold ideas to successfully deploy the world's most talented people from rethinking higher education to transforming immigration laws revitalizing urban hubs and encouraging private sector innovation The outlook may be gloomy now but it doesn't need to be The second American Century can happen by developing and deploying the next thinkers makers and risk takers who will power America's knowledge economy in the 21st century **Beyond Free College** Eileen L. Strempel, Stephen J. Handel, 2021-01-15 *Beyond Free College* outlines an audacious national agenda consistent with but far more comprehensive than the current free college movement that builds on the best of US higher education's populist history such as the GI Bill and the community college transfer function The authors align a wide constellation of higher education trends online learning prior learning assessment competency based learning high school college credit with a rapidly shifting student transfer environment that privileges college credit as the pivotal educational catalyst to boost access and completion The book's agenda seeks greater productive investment in postsecondary education by privileging a single metric lower cost per degree granted as the animating driver of a transfer pathway that will fulfill the potential of its historical progressive innovators *Beyond Free College*'s goal is as simple as it is urgent To galvanize higher education advocates in an effort to reorganize reorient and reignite the transfer function to serve the needs of a neotraditional student population that now constitutes the majority of college goers in America and in ways that advance completion not just access to higher education

Alternative Universities David J. Staley, 2019-03-26 Imagining the universities of the future How can we re envision the university Too many examples of what passes for educational innovation today MOOCs especially focus on transactions on questions of delivery In *Alternative Universities* David J Staley argues that modern universities suffer from a poverty of imagination about how to reinvent themselves Anyone seeking innovation in higher education today should concentrate instead he says on the kind of transformational experience universities enact In this exercise in speculative design Staley proposes ten models of innovation in higher education that expand our ideas of the structure and scope of the university suggesting possibilities for what its future might look like What if the university were designed around a curriculum of seven broad cognitive skills or as a series of global gap year experiences What if as a condition of matriculation students had to major in three disparate subjects What if the university placed the pursuit of play well above the acquisition and production of knowledge By asking bold What if questions Staley assumes that the university is always in a state of becoming and that there is not one idea of the university to which all institutions must aspire This book specifically addresses those engaged in university strategy university presidents faculty policy experts legislators foundations and entrepreneurs those involved in what Simon Marginson calls university making Pairing a critique tempered to our current moment with an explanation of how change and disruption might contribute to a new golden age for higher education *Alternative Universities* is an audacious and essential read

Working to Learn Noel S. Anderson, Lisette Nieves, 2020-01-02 This book disrupts the false dichotomy of college versus career by showing how young people and the programs created to serve them integrate the worlds of college and career readiness as students work to learn against the odds and strive toward lives that matter to them Work based learning at each stage of the K college experience is crucial to the development of young people Through analysis of national policies on college readiness and work based learning as well as through illustrative case studies of young people in work based learning programs the authors highlight the programs voices and experiences of young people from middle school through college Through interviews participating students share their views aspirations and preparation for both college and career

Leading Academic Change Elaine P. Maimon, 2023-07-03 Written by a sitting college president who has presided over transformative change at a state university this book takes on the big questions and issues of change and change management what needs to be done and how to do it Writing in a highly accessible style the author recommends changes for higher education such as the reallocation of resources to support full time faculty members in foundation level courses navigable pathways from community college to the university infusion rather than proliferation of courses and the role of state universities in countering the disappearance of the middle class The book describes how these changes can be made as well as why we must make them if our society is to thrive in the twenty first century

The Fantasy Economy Neil Kraus, 2023-10-06 This book offers a new perspective on wage stagnation growing inequality and the current education reform agenda The author argues that education must be understood as a necessary public service

providing critical benefits many of which are not strictly economic yet are essential for democratic society **Breakaway Learners** Karen Gross, 2017 This powerful book explores how institutions of higher education can successfully serve breakaway students first generation low income students who are trying to break away from the past in order to create a more secure future The gap between low SES and high SES students persists as efforts to close it have not met with great success In this provocative book Gross offers a new approach to addressing inequities by focusing on students who have succeeded despite struggling with the impacts of poverty and trauma Gross draws on her experience as a college president to outline practical steps that postsecondary institutions can take to create structures of support and opportunity that build reciprocal trust Students must trust their institutions and professors professors must trust their students and eventually students must learn to trust themselves A must read for academics policymakers teachers social service providers police chiefs and government officials Martha Kanter former under secretary U S Department of Education We need to pay attention to what Karen Gross says Read this book then share it Mark Huddleston president University of New Hampshire Karen Gross offers practical ideas based on her research and more importantly on her substantial leadership in assisting our nation s colleges and universities serving at risk students Marybeth Gasman University of Pennsylvania **Business Models to Promote Technology, Culture, and Leadership in Post-COVID-19 Organizations** Heinzman, Joseph Robert, Judge, Deborah S., Franklin, Vincent S., McCleskey, Jim A., 2022-06-24 Technology has always been important to organizations and a crucial aspect of their continued development Organizations that already relied on the most up to date technology and provided forward thinking leadership had a smoother transition during the COVID 19 pandemic which created turmoil for other organizations that were lacking in this type of leadership Leadership that implements current and future technology is vital to thrive in the post pandemic world Further study on this type of management and practice is required to ensure businesses are prepared and knowledgeable Business Models to Promote Technology Culture and Leadership in Post COVID 19 Organizations delves into how virtual technology has evolved to create remote offices and remote teaming in areas such as health education engineering and other business solutions The book also explores culture in a business and how individuals may interface communicate and collaborate in past current and future business models Covering key topics such as management public health and society this reference work is ideal for business owners managers human resource professionals supervisors scholars researchers academicians practitioners instructors and students
