Being A Character Psychoanalysis And Self Experience:

Being a Character Christopher Bollas,1993 Taking Freud's model of dreamwork as a model for all unconscious thinking Bollas argues that we dreamwork ourselves into becoming who we are He illustrates how patient and analyst can use such unconscious processes to alter self experience **Being a Character** Christopher Bollas,1997 **The Vitality of Objects** Joseph Scalia,2002-01-01 One of the most interesting theorists in contemporary psychoanalysis Bollas emphasizes both the creativity of subjectivity itself and the key place of experience in the formation of psychical constructions and fantasy Anthony Elliott Centre for Critical Theory University of the West of England This eclectic collection of essays reflects the far reaching multi dimensional influence of Christopher Bollas Bollas galvanises our understanding of what happens when people encounter the objects the endlessly variegated content of external reality Each of us has our own unique idiom through which we endow objects a painting a football a stranger with special meaning Bollas has added depth to our understanding of these relationships with vitality rarely found in psychoanalytic writing The contributors to this volume offer definitions and illustrations that make Bollas thought accessible for those approaching his work for the first time and illuminating for those more familiar with his canon The Vitality of Objects reveals the possibilities for self expression and growth that figure in the process of object relations and shows how and why thinkers and artists from so many different perspectives are attracted to Bollas thought **Being with the Body in Depth Psychology** Barbara Holifield,2024-12-11 Featuring a foreword by Donald Kalsched this important book examines the integration of the subjectively experienced body in the practice of depth psychology Barbara Holifield draws from philosophical perspectives neuroscientific and infant research developmental theory and trauma studies to offer a comprehensive overview of embodiment within a relationally based psychoanalytic approach Clinical vignettes demonstrate the critical value of working with the bodily felt dimension of implicit relational memory and emphasize how bodily felt sense facilitates access to feelings The mythopoetic reality revealed in depth psychotherapeutic process weaves all of this into a tapestry of personal meaning Here the body serves as a portal to the numinous healing that goes far beyond the relief of symptoms to a renewed sense of aliveness This book offers guiding principles for psychotherapists and clinicians of all levels to engage the bodily basis of experience in their clinical practice It will appeal to general readers interested in integrating mind and body including those in the healing arts fine arts dance athletics meditation yoga and martial arts *When the Garden Isn't Eden* Kerry L Malawista,Anne J Adelman,Linda Kanefield,2022-05-31 Stories can explore complicated ideas and bring shared experiences to life Footage of the Knicks upset win in the NBA finals triggers a traumatic memory of family tragedy A young girl starts bullying her best friend after her big sister goes off to sleepaway camp An adolescent works through her feelings of anger at her father over her parents divorce after discovering his infidelity A patient's ugly shoes remind an analyst of her own childhood scars A daughter recognizes her Holocaust survivor father's resilience as she comes to terms with his vulnerability after a life altering accident Bringing

Reijnders,2016-04-22 Fans constitute a very special kind of audience They have been marginalized ridiculed and stigmatized yet at the same time they seem to represent the vanguard of new relationships with and within the media Participatory culture has become the new normative standard Concepts derived from early fan studies such as transmedial storytelling and co creation are now the standard fare of journalism and marketing text books alike Indeed usage of the word fan has become ubiquitous The Ashgate Research Companion to Fan Cultures problematizes this exaltation of fans and offers a comprehensive examination of the current state of the field Bringing together the latest international research it explores the conceptualization of the fan and the significance of relationships between fans and producers with particular attention to the intersection between online spaces and offline places The twenty two chapters of this volume elucidate the key themes of the fan studies vernacular As the contributing authors draw from recent empirical work around the globe the book provides fresh insights and innovative angles on the latest developments within fan cultures both online and offline Because the volume is specifically set up as companion for researchers the chapters include recommendations for the further study of fan cultures As such it represents an essential reference volume for researchers and scholars in the fields of cultural and media studies communication cultural geography and the sociology of culture *Energies and Patterns in Psychological Type* John

Beebe,2016-06-17 This book encapsulates John Beebe's influential work on the analytical psychology of consciousness Building on C G Jung's theory of psychological types and on subsequent clarifications by Marie Louise von Franz and Isabel Briggs Myers Beebe demonstrates the bond between the eight types of consciousness Jung named and the archetypal complexes that impart energy and purpose to our emotions fantasies and dreams For this collection Beebe has revised and updated his most influential and significant previously published papers and has introduced in a brand new chapter a surprising theory of type and culture Beebe's model enables readers to take what they already know about psychological types and apply it to depth psychology The insights contained in the fifteen chapters of this book will be especially valuable for Jungian psychotherapists post Jungian academics and scholars psychological type practitioners and type enthusiasts

Beyond Doer and Done to Jessica Benjamin,2017-07-06 In *Beyond Doer and Done To* Jessica Benjamin author of the path breaking *Bonds of Love* expands her theory of mutual recognition and its breakdown into the complementarity of doer

and done to Her innovative theory charts the growth of the Third in early development through the movement between recognition and breakdown and shows how it parallels the enactments in the psychoanalytic relationship Benjamin s recognition theory illuminates the radical potential of acknowledgment in healing both individual and social trauma in creating relational repair in the transformational space of thirdness Benjamin s unique formulations of intersubjectivity make essential reading for both psychoanalytic therapists and theorists in the humanities and social sciences

Environmental Melancholia Renee Lertzman,2015-06-12 In this groundbreaking book Renee Lertzman applies psychoanalytic theory and psychosocial research to the issue of public engagement and public apathy in response to chronic ecological threats By highlighting unconscious and affective dimensions of contemporary ecological issues Lertzman deconstructs the idea that there is a gap between what people care about and what is actually carried out in policy and personal practice In doing so she presents an innovative way to think about and design engagement practices and policy interventions Based on key qualitative fieldwork and in depth interviews conducted in Green Bay Wisconsin each chapter provides a psychosocial psychoanalytic perspective on subjectivity affect and identity and considers what this means for understanding behaviour in relation to environmental crises and climate change The book argues for a theory of environmental melancholia that accounts for the ways in which people experience profound loss and disruption caused by environmental issues and yet may have trouble expressing or making sense of such experiences Environmental Melancholia offers a fresh perspective to the field of environmental psychology that until now has been largely dominated by research in cognitive behavioural and social psychology It will appeal to academics researchers and postgraduate students in the fields of psychoanalysis psychosocial studies and sustainability as well as policy makers and educators internationally
