Please note: Although the watch does not normally display the month, the latter must of course be correctly set to enable the perpetual calendar to function normally.

3.5 Correcting the day

Select the Day & Date function display:

pull the crown out: the date is replaced by a letter corresponding to the language in which the name of the day can be displayed; E for English, S for Spanish, F for French; while the day indication flashes; rotate the crown forward or backward to set the exact day in the language desired.

rotate the crown forward or backward to set the exact day in the language desired

push the crown back in: the date replaces the letter.

3.6 Synchronizing the analog and digital time displays

After a battery replacement or, exceptionally, a manipulation error, it may be necessary to synchronize the time shown by the hands with that displayed by the digital readout.

Select the neutral position:

pull the crown out: the digitally displayed time is not the same as the time shown by the hands;

rotate the crown backward or forward until the hands show exactly the same time as the display (rapid rotation of the crown will cause the hands to move in either direction by a complete hour);

push the crown back in;

returns the watch to the display of local time and reset the hands precisely (see point 3.2).

3.7 Changing timezones / to or from summer time

When travelling to another timezone or adjusting the watch to or from summer (daylight saving) time, the hands can be moved forward or backward by one or more complete hours without affecting the indications of the minute and seconds.

Select and display local time:

pull the crown out: the hour and minute digits will flash;

rotate the crown backward or forward quickly, causing the hands to move in either direction by a full hour with each rotation;

push the crown back in.

Please remember not to rotate the crown slowly after rotating it rapidly to change timezones.
