Plant Tissue Culture Manual - Supplement 7 K. Lindsey, 2013-11-11 Plant tissue culture has a long history dating back to the work of Gottlieb Haberlandt and others at the end of the 19th century but the associated concepts and techniques have reached a level of usefulness and application which has never been greater The technical innovations have given new insights into fundamental aspects of plant differentiation and development and have paved the way to the identification of strategies for the genetic manipulation of plants It is the aim of this manual to deliver a broad range of these techniques in a form which is accessible to students and research scientists of diverse backgrounds including those with little or no previous experience The themes of the manual aim to reflect those research areas which have been advanced by tissue culture technology As was the case for the sister volume Plant Molecular Biology Manual the objective has been from the start to produce a manual which is at home on the laboratory bench The plastic covered ring bound format has proved to be most popular and is retained here Equally the emphasis has been on producing a collection of detailed step by step protocols each supplemented with an introductory text and practical footnotes to provide the next best thing to a supervisor at one's shoulder

Diseases of Fruits and Vegetables S.A.M.H. Naqvi, 2007-05-08 Among the Horticultural Crops Fruits and Vegetables FV are of primary portance as the key source of essential components in an adequate and

balanced human diet FV have supported largely the daily food requirement of mankind since ages and even before man learned to grow cereal crops systematically Over the years growing FV has been the mainstay of rural economy and has emerged as an indispensable part of agriculture world over offering farmers a wide range of crops in varied topography and climate In certain parts of the world FV are the major dietary staple Apart from being a rich source of vitamins and minerals this sector also contributes significantly in economy of the region or the nation The increased income from per unit area of FV is far ahead and can not be compared with that of cereal crops A recent survey by the Economist revealed that the world population has creased by 90 % in the past 40 years while food production has increased only by 25 % per head With an additional 1 5 billion mouth to feed by 2020 farmers worldwide have to produce 39 % more Looking at the load of the future food requirement the global increased production of FV during last few years has absorbed the additional food requirement and accordingly the eating habits are also changing and shifting wards more consumption of these commodities worldwide
