Handbook of Research on Global Fashion Management and Merchandising Vecchi, Alessandra, 2016-05-03

Innovation and novel leadership strategies have aided the successful growth of the fashion industry around the globe. However, as the dynamics of the industry are constantly changing, a deficit can emerge in the overall comprehension of industry strategies and practices. The *Handbook of Research on Global Fashion Management and Merchandising* explores the various facets of effective management procedures within the fashion industry. Featuring research on entrepreneurship, operations management, marketing, business modeling, and fashion technology, this publication is an extensive reference source for practitioners, academics, researchers, and students interested in the dynamics of the fashion industry. **Wearable**

Technologies: Concepts, Methodologies, Tools, and Applications Management Association, Information

Resources, 2018-04-06. Advances in technology continue to alter the ways in which we conduct our lives, from the private sphere to how we interact with others in public. As these innovations become more integrated into modern society, their applications become increasingly relevant in various facets of life. *Wearable Technologies: Concepts, Methodologies, Tools, and Applications* is a comprehensive reference source for the latest scholarly material on the development and implementation of wearables within various environments, emphasizing the valuable resources offered by these advances. Highlighting a range of pertinent topics such as assistive technologies, data storage, and health and fitness applications, this multi-volume book is ideally designed for researchers, academics, professionals, students, and practitioners interested in the emerging applications of wearable technologies. *The Visual Imperative* Lindy Ryan, 2016-03-14. Data is powerful. It separates leaders from laggards and it drives business disruption, transformation, and reinvention. Today's most progressive companies are using the power of data to propel their industries into new areas of innovation, specialization, and optimization. The horsepower of new tools and technologies have provided more opportunities than ever to harness, integrate, and interact with massive amounts of disparate data for business insights and value, something that will only continue in the era of the Internet of Things. And as a new breed of tech-savvy and digitally native knowledge workers rise to the ranks of data scientist and visual analyst, the needs and demands of the people working with data are changing too. The world of data is changing fast, and it's becoming more visual. Visual insights are becoming increasingly dominant in information management, and with the reinvigorated role of data visualization, this imperative is a driving force to creating a visual culture of data discovery. The traditional standards of data visualizations are making way for richer, more robust, and more advanced visualizations and new ways of seeing and interacting with data. However, while data visualization is a critical tool to exploring and understanding bigger and more diverse and dynamic data by understanding and embracing our human hardwiring for visual communication and storytelling, and properly incorporating key design principles and evolving best practices, we take the next step forward to transform data visualizations from tools into unique visual information assets. Discusses several years of in-depth industry research and

presents vendor tools approaches and methodologies in discovery visualization and visual analytics Provides practicable and use case based experience from advisory work with Fortune 100 and 500 companies across multiple verticals Presents the next generation of visual discovery data storytelling and the Five Steps to Data Storytelling with Visualization Explains the Convergence of Visual Analytics and Visual discovery including how to use tools such as R in statistical and analytic modeling Covers emerging technologies such as streaming visualization in the IOT Internet of Things and streaming animation

If You're in a Dogfight, Become a Cat! Leonard Sherman, 2017-01-10 Businesses often find themselves trapped in a competitive dogfight scratching and clawing for market share with products consumers view as largely undifferentiated Conventional wisdom suggests that dogfights are to be expected as marketplaces mature giving rise to the notion that there are bad industries where it is unlikely that any company can succeed But there are notable exceptions in which enlightened executives have changed the rules to grasp the holy grail of business long term profitable growth Rather than joining the dogfights raging within their industry companies such as Apple FedEx and Starbucks have chosen to become metaphorical cats continuously renewing their distinctive strategies to compete on their own terms In *If You're in a Dogfight, Become a Cat* Leonard Sherman draws on four decades of experience in management consulting venture capital and teaching business strategy at Columbia Business School to share practical advice on two of the most vexing issues facing business executives why is it so hard to achieve long term profitable growth and what can companies do to break away from the pack Sherman takes the reader on a provocative journey through the building blocks of business strategy by challenging conventional wisdom on a number of questions that will redefine management best practices What should be the overarching purpose of your business Do you really know what your strategy is Is there such a thing as a bad industry Where do great ideas come from and how do I find them What makes products meaningfully different What makes and breaks great brands How and when should I disrupt my own company What are the imperatives to achieving long term profitable growth Filled with dozens of illustrative examples of inspiring successes and dispiriting falls from grace this book provides deep insights on how to become the cat in a dogfight whether you are a CEO mid level manager aspiring business school student or curious observer interested in achieving sustained profitable growth

AI, Pandemic and Healthcare Nuoya Chen, 2024-02-13 The demand for telehealth solutions has been growing exponentially after the Covid 19 pandemic Hospitals remain understaffed which leads to staff burnouts and unsatisfactory patient experience They also find it difficult to use AI to reduce the workload for doctors and nurses Doctors barely use data collected from wearables and home use medical devices to make diagnosis As generative AI advances traditional medical device manufacturers are exploring with open innovation to transform into a software based business model facing competition from large tech companies and startups This book shares the perspectives from different stakeholders around the challenges of the use of AI in healthcare
