Smartphones as Locative Media Jordan Frith, 2018-06-06 Smartphone adoption has surpassed 50% of the population in more than 15 countries and there are now more than one million mobile applications people can download to their phones. Many of these applications take advantage of smartphones as locative media, which is what allows smartphones to be located in physical space. Applications that take advantage of people's location are called location-based services, and they are the focus of this book. Smartphones as locative media raise important questions about how we understand the complicated relationship between the Internet and physical space. This book addresses these questions through an interdisciplinary theoretical framework and a detailed analysis of how various popular mobile applications including Google Maps, Facebook, Instagram, Yelp, and Foursquare use people's location to provide information about their surrounding space. The topics explored in this book are essential reading for anyone interested in how smartphones and location-based services have begun to impact the ways we navigate and engage with the physical world.

Fall Prevention Through Design in Construction Imriyas Kamardeen, 2015-06-05 The role of designers has traditionally been to design a building so that it conforms to accepted local building codes. The safety of workers is left up to the contractor building the designs. Research shows, however, that designers can have an especially strong influence on construction safety during the concept, preliminary, and detailed design phases. This book establishes the new knowledge and conceptual frameworks necessary to develop a mobile computing-enabled knowledge management system that can help reduce the high rate of construction falls. There are three main objectives of this book: 1. To create a new Prevention through Design (PtD) knowledge base to model the relationships between fall risks and design decisions; 2. To develop a PtD mobile App to assist building designers in fall prevention through design; 3. To evaluate the practical implications of the PtD mobile App for the construction industry, especially for building designers and workers. The cutting-edge technologies explored in this book have the potential to significantly reduce the rate of serious injuries that occur in the global construction industry. This is essential reading for researchers and advanced students of construction management with an interest in safety or mobile technologies.

Fall Prevention and Protection Hongwei Hsiao, PhD, 2016-11-03 This book covers a wealth of knowledge from experts and informed stakeholders on the best ways to understand, prevent, and control fall-related risk exposures. Featured are subjects on: 1. a public health view of fall problems and strategic goals; 2. the sciences behind human falls and injury risk; 3. research on slips, trips, and falls; 4. practical applications of prevention and protection tools and methods in industrial sectors and home communities; 5. fall incident investigation and reconstruction; and 6. knowledge gaps, emerging issues, and recommendations for fall protection research and fall mitigation.
