Applied Physics for Engineers P.K. Diwan, 2014 **Swift Heavy Ions for Materials Engineering and Nanostructuring** Devesh Kumar Avasthi, Girijesh Kumar Mehta, 2011-05-24 Ion beams have been used for decades for characterizing and analyzing materials. Now energetic ion beams are providing ways to modify the materials in unprecedented ways. This book highlights the emergence of high energy swift heavy ions as a tool for tailoring the properties of materials with nanoscale structures. Swift heavy ions interact with materials by exciting ionizing electrons without directly moving the atoms. This opens a new horizon towards the so called soft engineering. The book discusses the ion beam technology emerging from the non equilibrium conditions and emphasizes the power of controlled irradiation to tailor the properties of various types of materials for specific needs. *Indian Journal of Pure & Applied Physics*, 2005

Bioelectronics Anuj Kumar, Ram K. Gupta, 2022-12-08 Bioelectronics is emerging as a new area of research where electronics can selectively detect, record and monitor physiological signals. This is a rapidly expanding area of medical research that relies heavily on multidisciplinary technology development and cutting edge research in chemical, biological, engineering and physical science. This book provides extensive information on the i) fundamental concepts of bioelectronics, ii) materials for the developments of bioelectronics such as implantable electronics, self powered devices, bioelectronic sensors, flexible bioelectronics etc, and iii) an overview of the trends and gathering of the latest bioelectronic progress. This book will broaden our knowledge about newer technologies and processes used in bioelectronics. **Radiation Effects in Polymeric**

Materials Vijay Kumar, Babulal Chaudhary, Vishal Sharma, Kartikey Verma, 2019-02-09 This book provides an introduction of how radiation is processed in polymeric materials, how materials properties are affected and how the resulting materials are analyzed. It covers synthesis, characterization or modification of important materials e.g. polycarbonates, polyamides and polysaccharides using radiation. For example, a complete chapter is dedicated to the characterization of biodegradable polymers irradiated with low and heavy ions. This book will be beneficial to all polymer scientists in the development of new macromolecules and to all engineers using these materials in applications. It summarizes the fundamental knowledge and latest innovations in research fields from medicine to space. **Proceedings of the Indian Science Congress**
