**Computer-Aided Architectural Design Futures (CAADFutures) 2007** Andy Dong, Andrew Vande Moere, Asko Riitahuhta, 2007-11-07 CAAD Futures is a biennial conference that aims to promote the advancement of computer aided architectural design research and teaching The conferences are organised under the auspices of the CAAD Futures Foundation The conference series started in 1985 in Delft and has since traveled to major cities in Europe Asia and USA This volume is the proceedings of the 12th International Conference of CAAD Futures which took place in Sydney Australia The internationally refereed papers in this book present the state of the art in computer aided architectural design research The papers in this year's conference theme Integrating Technologies for Computer Aided Design provide the technological foundation for new ways of thinking about using computers in designing and the use of computers in design itself as well as in the education of designers Information about the 2007 Conference and this book is available at <http://www.arch.usyd.edu.au/kcdc/conferences/cf07> **Artificial Intelligence in Design '02** Asko Riitahuhta, 2013-04-17 One of the foundations for

change in our society comes from designing Its genesis is the notion that the world around us either is unsuited to our needs or can be improved The need for designing is driven by a society's view that it can improve or add value to human existence well beyond simple subsistence As a consequence of designing the world which we inhabit is increasingly a designed rather than a naturally occurring one In that sense it is an artificial world Designing is a fundamental precursor to manufacturing fabrication construction or implementation Design research aims to develop an understanding of designing and to produce models of designing that can be used to aid designing Artificial intelligence has provided an environmental paradigm within which design research based on computational constructions can be carried out Design research can be carried out in variety of ways It can be viewed as largely an empirical endeavour in which experiments are designed and executed in order to test some hypothesis about some design phenomenon or design behaviour This is the approach adopted in cognitive science It often manifests itself through the use of protocol studies of designers The results of such research form the basis of a computational model A second view is that design research can be carried out by positing axioms and then deriving consequences from them **Handbuch interkulturelle Kommunikation und Kompetenz** Jürgen Straub, Arne
