Simulating Visitor Behavior Kutay Güler, 2016-02-29 The dynamics of the interplay between the visitor and the exhibition environment form complex circulation patterns As an exhibition designer developing an understanding of those dynamics is important for improving visitor satisfaction However an overwhelming number of variables may transform the exhibition design process into educated guesswork Designing through trial and error is just not feasible In addition as a result of the nature of creating built environments modifying decisions later in the design process results in significant costs The designer has to rely on extensive experience to succeed Accordingly implementing a method for guidance into the design process should prove valuable for the designer This book discusses the development stages of a simulation application for visitor

circulation in exhibition environments and presents the challenges of integrating a complex mathematical process into a visual and artistic process like exhibition design Those issues include understanding the individual stages of development building a theoretical foundation creating a simulation framework composing individual operations and implementing the finalized simulation into the design process Taken together this process sheds light on the underlying challenges of creating a functioning simulation The contents of this book will be beneficial not only for exhibition designers and simulation developers but also anyone interested in visitor behavior and spatial design Internet of Things and Its Applications Keshav Dahal,Debasis Giri,Sarmistha Neogy,Subrata Dutta,Sanjay Kumar,2022-02-18 This volume constitutes selected papers presented at the International Conference on IoT and its Applications 2020 The research papers presented were carefully reviewed and selected from several initial submissions on the topics the Internet of Things IoT and its applications such as smart cities smart devices agriculture transportation and logistics healthcare etc The book contains peer reviewed chapters written by leading international scholars from around the world This book will appeal to students practitioners industry professionals and researchers working in the field of IoT and its integration with other technologies to develop comprehensive solutions to real life problems *Living Communities and Their Archaeologies in the Middle East* Rick Bonnie,Marta Lorenzon,Suzie Thomas,2023-09-29 This volume presents theoretical ideas case studies and reflective insights on community archaeology across the Middle East with contributions by scholars working in and from Iraq Israel Jordan Palestine and Syria The chapters represent a multitude of insights from contemporary public archaeology practice drawing on theoretical frameworks and discussing the realities of challenges and opportunities presented by opening up archaeological experiences to wider publics in different social and political settings In particular the volume focuses on the following three themes 1 defining and reflecting on community in community archaeology 2 which archaeologies to employ in community archaeology and 3 measuring the success and failure of community archaeology In addressing these issues the chapters reflect different historical trajectories and cultures that enable us to find similarities and differences in the theory and practice of community archaeology In more recent decades a shift has been noticed among both national authorities and foreign archaeological expeditions with more emphasis on local heritage experiences However this frequently took the form of guiding and introducing communities to their heritage Only more recently local voices have become more heard in definitions of heritage and decisions on preservation matters with more projects tying these voices into their research objectives This volume presents several projects that combine postcolonial approaches citizen participation and community work across the Middle East By focusing especially on this geographical area the volume also reflects upon the current state of public and community archaeology in this unique and complex region adding to the already rich literature from the rest of the world The Middle East has a long fascinating but also complicated history of archaeological investigation deeply entrenched in colonization and more recently in the decolonization process The involvement and social values of the

associated communities have often been overlooked in academic discussions This book aims to redress that imbalance and present original research that reflects on the work of current scholars and practitioners and draws similarities and differences from diverse cultures
