California Bank and Shore Rock Slope Protection Design James A. Racine, 1997 The report clarifies the procedure of the California Bank and Shore CABS layered rock slope protection RSP design method. There are solved problems, figures, and tables for practitioners who design and build flexible rock revetments by the CABS method. There are field evaluations of sixty-five sites, tabled by location and design method. The authors and local practicing engineers in design, construction, and maintenance critically evaluated sites along stream and river banks and ocean shores among five states: Washington, Oregon, California, Colorado, and Mississippi. Ninety photographs show significant design and construction features of riprap. Annotations are presented for fifty-eight references. **GATE Question Bank - Production & Industrial Engineering**

Simulation Modeling and Arena Manuel D. Rossetti, 2015-06-10 Emphasizes a hands-on approach to learning statistical analysis and model building through the use of comprehensive examples, problems, sets, and software applications. With a unique blend of theory and applications, *Simulation Modeling and Arena* Second Edition integrates coverage of statistical analysis and model building to emphasize the importance of both topics in simulation. Featuring introductory coverage on how simulation works and why it matters, the Second Edition expands coverage on static simulation and the applications of spreadsheets to perform simulation. The new edition also introduces the use of the open-source statistical package R for both performing statistical testing and fitting distributions. In addition, the models are presented in a clear and precise pseudo-code form which aids in understanding and model communication. *Simulation Modeling and Arena* Second Edition also features updated coverage of necessary statistical modeling concepts such as confidence interval.
