MacKinnon, Beth Archer-Kuhn, 2023-07-03 How do you develop students capacities as independent learners build their confidence and motivation to identify their own research agendas and facilitate their critical thinking and research skills for effectively exploring their chosen topic Inquiry based learning IBL offers a proven means to achieve these outcomes IBL is a scaffolded learner centered student led approach to inquiry whereby students progressively design and lead their own inquiry process with support from the instructor It s a powerful pedagogical approach that you can progressively adopt first adopting it as an activity in a course to develop you and your students comfort with the practice

right up to developing an entire course or program utilizing IBL. It offers varying levels of engagement as you and your students gain familiarity with the practice from the instructor providing structured support to formative guidance as students gain confidence to a point where students become increasingly self directed and independent and are supported by the review of student peers and validated by presentations of their work to the class. This pedagogy shifts the student instructor relationship with the former leading and the latter supporting. IBL is a flexible teaching and learning approach that can be progressively adopted and developed without a specific formula and that positions students as co constructors of knowledge rather than passive recipients. It is student driven, creates engagement, develops a curiosity mindset, promotes group learning that is collaborative rather than competitive, fosters metacognition and builds confidence as students learn to deal with ambiguity and risk. Each chapter offers personal stories, vignettes, examples of practice and discussions of issues. This book offers higher education instructors at any career stage and in any discipline a realistic guide to incorporating curiosity and inquiry based learning into their classrooms to promote long term knowledge creation and retention and life wide learning. IBL is being increasingly adopted across the English speaking world. Beyond its inherent capacity to promote independent learning, it offers a perfect foundation for preparing students for Signature Work and capstone courses and is adaptable to small and large classes.
