Asa Umpire Manual 2013 Rules:

Ex Aequo et Bono as a Response to the 'Over-Judicialisation' of International Commercial Arbitration

Nobumichi Teramura, 2020-05-12 Despite its many distinguished proponents over time *ex aequo et bono* the idea of deciding disputes on the basis of what an adjudicator regards as fair and equitable has failed to take hold in international commercial arbitration ICA Formalisation and fossilisation of arbitral procedure as manifested in the increasing use of litigation style practice unfortunately reign instead This bold and challenging book argues that parties to an arbitration should be more willing for their cross border disputes to be decided and arbitrators should be more prepared to decide those disputes in accordance with broad principles of equity and fairness rather than by strict adherence to technical rules of law Putting forward suggestions based on extensive research and doctrinal considerations this book invites us to confront what ICA was supposed to be what it now is and what it can be In particular Dr Teramura discusses how by resorting to *ex aequo et bono* arbitrators can construe contractual terms including the limits apply trade usages deal with mandatory rules of a given forum or place of performance minimise the cost and length of time that arbitration takes avoid the abuse of discretion and ensure predictable results The book examines significant differences in the way that *ex aequo et bono* arbitration is understood among various state and international institutions It attempts to identify a common core of universally accepted concepts underlying those different understandings The book argues that *ex aequo et bono* has the potential to reform ICA without undermining its positive aspects Along the way it discusses the implications of *ex aequo et bono* arbitration on the now widely used UNCITRAL Model Law on ICA It should thus appeal to lay business persons and commercial law practitioners who are looking for an economical and efficient way to solve business disputes within a globalised arbitration framework

The Architecture of the Playing Field Richard L. Cleary, 2025-05-06 A novel exploration of playing fields as aesthetic and architectural spaces that frame athletes creativity and spectators evolving experiences of sport The playing field is more than an arena for sporting rivalry It is a laboratory of invention where athletes and coaches create new uses for the human body in response to the constraints and affordances of space Indeed Richard Cleary argues that from translucent squash courts to the NBA three point line to the city streets used by skateboarders all sports have embedded spatial relationships that are also charged with social significance The Architecture of the Playing Field explores the aesthetic and physical experiences of the grounds on which we compete Cleary digs into the perspectives of spectators athletes coaches and umpires perspectives that have changed along with the shifting configuration and mediation of the field from early live sports coverage to today s TV broadcasts overlaid with high tech graphics and observed from every angle Cleary shows how rules governing the size shape and divisions of the field reflect sports entwinement with societies at large in particular the politics of race and gender Mindful as well that some sports resist containment he analyzes the disruptive use of space by snowboarders and parkour athletes The Architecture of the Playing Field sensitizes us to the interplay of settings and bodies in motion fundamental to the power of sport
