

Improved item management

Autodesk Vault Professional 2015 R2 includes several usability enhancements and new features to improve your item workflows.

■ User interface consistency

The user experience has been improved to help you work with items more efficiently. You now have a more visual and intuitive approach to item management that is consistent with document methods for tasks such as change state, revisions, and categories.

■ Item versions

In addition to capturing specific item revision history, you are now able to view all item versions. This enables you to see changes made to the item between releases—including property and document updates on the general tab through to history, where used, and the bill of materials.

■ Assign item category

As in previous versions of Vault Professional, you can automatically categorize items based on predefined rules and change the item category as required. The latest release introduces the ability to assign a category on creation. This administrator-controlled setting permits users to select a category from the available list, streamlining the process when creating new items.

■ Write-back item properties

In response to customer requests, you can now use the Vault CAD add-ins, Vault Explorer, or the job processor to map and write back item properties directly to the CAD files for cleaner and more accurate design documentation.

■ Item dialog usability

Updates to the item dialog enable you to configure the associated files list view in the General tab, resize the view within the General and View tabs, and easily access Exit Edit Mode with toolbar changes.

In addition, Save As has been improved to create the new item in edit mode ready to update. Watermarking has also been refreshed to provide configurable stamp settings.
