Godunov Methods E.F. Toro, 2012-12-06 This edited review book on Godunov methods contains 97 articles all of which were presented at the international conference on Godunov Methods Theory and Applications held at Oxford in October 1999 to commemorate the 70th birthday of the Russian mathematician Sergei K Godunov The meeting enjoyed the participation of 140 scientists from 20 countries one of the participants commented everyone is here meaning that virtually everybody who had made a significant contribution to the general area of numerical methods for hyperbolic conservation laws along the lines first proposed by Godunov in the fifties was present at the meeting Sadly there were important absentees who due to personal circumstance could not attend this very exciting gathering The central theme of the meeting and of this book was numerical methods for hyperbolic conservation laws following Godunov's key ideas contained in his celebrated paper of 1959 But Godunov's contributions to science are not restricted to Godunov's method

Computational Plasticity

Mao-Hong Yu, Jian-Chun Li, 2012-12-02 Computational Plasticity with Emphasis on the Application of the Unified Strength Theory explores a new and important branch of computational mechanics and is the third book in a plasticity series published by Springer The other two are Generalized Plasticity Springer Berlin 2006 and Structural Plasticity Springer and Zhejiang University Press Hangzhou 2009 This monograph describes the unified strength theory and associated flow rule the implementation of these basic theories in computational programs and shows how a series of results can be obtained by using them The unified strength theory has been implemented in several special nonlinear finite element programs and commercial Finite Element Codes by individual users and corporations Many new and interesting findings for beams plates underground caves excavations strip foundations circular foundations sloped underground structures of hydraulic power stations pumped storage power stations underground mining high velocity penetration of concrete structures ancient structures and rocket components along with relevant computational results are presented This book is intended for graduate students researchers and engineers working in solid mechanics engineering and materials science The theories and methods provided in this book can also be used for other computer codes and different structures More results can be obtained which put the potential strength of the material to better use thus offering material saving and energy saving solutions Mao Hong Yu is a professor at the Department of Civil Engineering at Xi'an Jiaotong University Xi'an China

Concrete Structures Under Projectile Impact Qin Fang, Hao Wu, 2017-03-22 In this book the authors present their theoretical experimental and numerical investigations into concrete structures subjected to projectile and aircraft impacts in recent years Innovative approaches to analyze the rigid mass abrasive and eroding projectile penetration and perforation are proposed Damage and failure analyses of nuclear power plant containments impacted by large commercial aircrafts are numerically and experimentally analyzed Ultra high performance concrete materials and structures against the projectile impact are developed and their capacities of resisting projectile impact are evaluated This book is written for the researchers

engineers and graduate students in the fields of protective structures and terminal ballistics

Structural Failure and Plasticity X.L. Zhao, R.H. Grzebieta, 2000-10-04 As mankind continues to push back the boundaries and begins to explore other worlds and the ocean depths a thorough understanding of how structures behave when subjected to extremes in temperature pressure and high loading rates will be essential This symposium provided the perfect forum for presenting research into structures subjected to such extreme loads There were a large number of papers presented under topics of impact blast and shock loading indicating a strong research interest in high rates of loading Similarly new topics have been added to the traditional symposium list such as fire loading earthquake loading and fatigue and connection failures It is clear now that fundamental knowledge of plastic deformation of structures to various extreme loads is coming of age Each full paper was peer reviewed by at least two experts in the field
