APES Free Response Questions

Directions: Answer the following FRQs as thoroughly and specifically as time permits. Where explanation or discussion is required, support your answers with relevant information and/or specific examples. Please be sure to address all parts of the question. The suggested time to complete all parts of this FRQ is about 10 minutes.

FRQ 1 - Intro (Unit 1)

Chapter 1: Developed Countries have steadily become the largest consumers of resources and at the same time have been wasting more resources than they actually need. This has led to an imbalance of resource utilization among the countries of the world. The poor countries under-consume while the prosperous over-consume. This has led to a growing condition known as affluenza.

- Define what is meant by affluenza.
- How can affluenza be implicated in having a negative effect on the environment?
- How can affluenza be implicated in having a positive effect on the environment?
- What would happen if the other countries of the world developed to have the same high level of consumption as the U.S.?

FRQ 2 - Scientific Method (Unit 1)

Chapter 2: To help us develop sustainability, scientists work hard to find answers to today's problems and issues. To be credible, scientists must follow a series of steps during their investigations, a process known as the scientific method.

- Why is it socially important that scientists be seen as credible sources of information?
- Define the scientific method.
 - Explain the steps utilized in "good science" methodology.
 - Explain the two steps of reasoning used by scientists.
 - Explain what is meant by a paradigm shift with respect to scientific thinking.
- Explain the difference between a scientific hypothesis, scientific theory, and scientific law.

FRQ 3 - Sustainable Cities (Unit 1)

Chapter 12b: Recently a "breaking" news item appeared in bold, flashing letters at the City of West Marshall website. The news item described the unanimous vote of the City Council to approve a new 10-story parking garage on a city-owned land in Downtown. The item went on to say that the city will give the land to the developer for free along with other tax incentives because the parking garage will help revitalize Downtown by encouraging more area residents to visit the City Center.

- Give THREE reasons why sustainable living should be a worthy goal for any urban community.
- Describe THREE strategies that can be used to make many existing cities more livable.
- Give TWO examples of American states, cities, or communities that have implemented one or more of the sustainable urban development strategies, and describe what was actually done.

FRQ 4 - Worldviews (Unit 1)

Chapter 25: Recently, a controversy erupted over the efforts of the state of Maryland to rid the Chesapeake Bay area of a large and growing population of non-native swan. The swan was said to be of European origin. The report did not say how or when the swan arrived in the area. However, it was clear that they have adapted very well. Their population has increased greatly, and they are said to be putting pressure on the local ecosystem, which is the reason the state embarked on the program to rid the area of the swan. The chosen elimination approach involves inducing successive reproductive failure in the birds by coating their eggs with cooking oil. The oil ensures that the eggs can't breathe, which ensures that they will not hatch. While everyone agrees that the elimination approach is very humane, not everyone is happy with the elimination program itself. Most environmental organizations in the area are very supportive of the state on this issue. However, one organization is very upset with the program. Their spokesperson claims that its analysis of the state's data showed that the swan has adapted very well to the area, and that the bird has shown no significant impact on the local ecosystem.

- Describe TWO environmental worldviews that could be the basis for those environmentalists who supported the state on the issue.
- Explain TWO other worldviews that could be the basis of the opponents' position.
- Explain why it is possible for the two analysts to arrive at very different conclusions even though they were logically examining the same data set.
