Aphasia And Its Therapy Medicine

**Michael Selzer, Stephanie
Clarke, Leonardo Cohen, Pamela
Duncan, Fred Gage**

Aphasia And Its Therapy Medicine:

Aphasia and Its Therapy Anna Basso,2003-01-09 This is the first single authored book to attempt to bridge the gap between aphasia research and the rehabilitation of patients with this language disorder Studies of the deficits underlying aphasia and the practice of aphasia rehabilitation have often diverged and the relationship between theory and practice in aphasiology is loose The goal of this book is to help close this gap by making explicit the relationship between what is to be rehabilitated and how to rehabilitate After providing a sketch of a working theory of aphasia Basso describes intervention procedures for disorders resulting from damage at the lexical and sentence levels as well as a more general conversation based intervention for severe aphasics *API Textbook of Medicine* Yash Pal Munjal,2012 *Textbook of Neural Repair and Rehabilitation: Volume 2, Medical Neurorehabilitation* Michael E. Selzer,Stephanie Clarke,Leonardo G. Cohen,Gert Kwakkel,Robert H. Miller,2014-04-24 In two freestanding volumes Textbook of Neural Repair and Rehabilitation provides comprehensive coverage of the science and practice of neurological rehabilitation Revised throughout bringing the book fully up to date this volume Medical Neurorehabilitation can stand alone as a clinical handbook for neurorehabilitation It covers the practical applications of the basic science principles presented in Volume 1 provides authoritative guidelines on the management of disabling symptoms and describes comprehensive rehabilitation approaches for the major categories of disabling neurological disorders New chapters have been added covering genetics in neurorehabilitation the rehabilitation team and the economics of neurological rehabilitation and brain stimulation along with numerous others Emphasizing the integration of basic and clinical knowledge this book and its companion are edited and written by leading international authorities Together they are an essential resource for neuroscientists and provide a foundation of the work of clinical neurorehabilitation professionals *Aphasia and Related Neurogenic Communication Disorders* Ilias Papathanasiou,Patrick Coppens,2016-02-11 Aphasia and Related Neurogenic Communication Disorders Second Edition reviews the definition terminology classification symptoms and neurology of aphasia including the theories of plasticity and recovery Best practices of aphasia assessment and intervention are presented including neuropsychological models and formal and informal testing procedures to maximize correct clinical rehabilitative decisions Theoretical bases for rehabilitation guidelines for organization and delivery of evidence based therapy as well as augmentative and alternative communication therapy and computer based treatments are also presented Application and Evaluation of Acupuncture in the Treatment of Neurological Diseases Liming Lu,Nenggui Xu,Myeong Soo Lee,Chunzhi Tang,Yong Tang,Bing Zhu,2023-06-21 Neurological disorders such as Alzheimer s disease and Parkinson s disease are an important cause of disability and death worldwide and pose a serious burden on the global health system over the past 30 years Acupuncture as the most widely used traditional Chinese medicine therapy in the world has been widely used in 183 countries and regions Acupuncture can treat more than 300 kinds of diseases especially for neurological diseases Due to the unique advantages of acupuncture such as good

therapeutic effect and low side effects many researchers have conducted extensive clinical studies on the effectiveness and safety of acupuncture in the treatment of neurological diseases laying a foundation for the practicability and scientific vigor of this complementary and alternative therapeutic approach There are still many problems unanswered in the current clinical research on acupuncture for the treatment of neurological diseases First of all clinical research is lagging behind due to the lack of emphasis on modern advanced methods and analytical techniques e g artificial intelligence omics analysis bioinformatics analysis data mining and multidisciplinary integration process Secondly the quality of reports on most clinical studies of acupuncture treatment for neurological diseases is extremely low Most clinical studies have not adopted standardized methodological evaluations authoritative disease diagnosis standards and efficacy evaluation standards The lack of compliance regulations and strict study design reduces the accuracy and authenticity of the research Thirdly there is a lack of integrated assessment of the distribution of evidence for acupuncture treatment of neurological diseases Therefore strictly designed clinical research and in depth and systematic analysis method are currently needed to provide high quality evidence for acupuncture treatment of neurological diseases In this Research Topic we hope to further understand the role of acupuncture in the treatment of neurological diseases through clinical research and secondary research The range of acupuncture includes manual acupuncture electro acupuncture body needling auricular acupuncture scalp acupuncture laser acupuncture and acupressure etc Neurological diseases include stroke meningitis encephalitis tetanus Alzheimer s disease and other dementias Parkinson s disease epilepsy multiple sclerosis motor neurone disease migraine tense type headaches headaches from drug overuse and others

Textbook of Neural Repair and Rehabilitation: Volume 2, Medical Neurorehabilitation Michael Selzer, Stephanie Clarke, Leonardo Cohen, Pamela Duncan, Fred Gage, 2006-02-16 In two freestanding but linked volumes Textbook of Neural Repair and Rehabilitation provides comprehensive coverage of the science and practice of neurological rehabilitation This volume Medical Neurorehabilitation can stand alone as a clinical handbook for neurorehabilitation It covers the practical applications of the basic science principles presented in volume 1 provides authoritative guidelines on the management of disabling symptoms and describes comprehensive rehabilitation approaches for the major categories of disabling neurological disorders Emphasizing the integration of basic and clinical knowledge this book and its companion are edited and written by leading international authorities Together they are an essential resource for neuroscientists and provide a foundation for the work of clinical neurorehabilitation professionals
