Digital Apollo David A. Mindell, 2011-09-30 The incredible story of how human pilots and automated systems worked together to achieve the ultimate achievement in flight the lunar landings of NASA's Apollo program As Apollo 11's Lunar Module descended toward the moon under automatic control a program

alarm in the guidance computer's software nearly caused a mission abort Neil Armstrong responded by switching off the automatic mode and taking direct control He stopped monitoring the computer and began flying the spacecraft relying on skill to land it and earning praise for a triumph of human over machine In Digital Apollo engineer historian David Mindell takes this famous moment as a starting point for an exploration of the relationship between humans and computers in the Apollo program In each of the six Apollo landings the astronaut in command seized control from the computer and landed with his hand on the stick Mindell recounts the story of astronauts desire to control their spacecraft in parallel with the history of the Apollo Guidance Computer From the early days of aviation through the birth of spaceflight test pilots and astronauts sought to be more than spam in a can despite the automatic controls digital computers and software developed by engineers Digital Apollo examines the design and execution of each of the six Apollo moon landings drawing on transcripts and data telemetry from the flights astronaut interviews and NASA's extensive archives Mindell's exploration of how human pilots and automated systems worked together to achieve the ultimate in flight a lunar landing traces and reframes the debate over the future of humans and automation in space The results have implications for any venture in which human roles seem threatened by automated systems whether it is the work at our desktops or the future of exploration

Moondust Andrew Smith, 2006-04-04 In 1999 Andrew Smith was interviewing Charlie Duke astronaut and moon walker for the Sunday Times During the course of the interview which took place at Duke's Texan home the telephone rang and Charlie left the room to answer it When he returned some twenty minutes later he seemed visibly upset It seemed that he'd just heard that the previous day one of his fellow moon walkers the astronaut Pete Conrad had died The more Charlie spoke the more Andrew realised that his grief was something more than the mere fact of losing a friend Now there's only nine of us he said Only nine Which meant that one day not long from now there would be none and when that day came no one on earth would have known the giddy thrill of gazing back at us from the surface of the moon The thought shocked Andrew and still does Moondust is his attempt to understand why The Apollo moon programme has been called the last optimistic act of the 20th Century Over a strange three year period

between 1969 and 1972 twelve men made the longest and most eccentric of all journeys and all were indelibly marked by it In *Moondust* Andrew sets out to interview all the remaining astronauts who walked on the moon and to find out how their lives were changed for ever by what had happened Where do you go after you've been to the moon In addition to this question that would prove hugely troubling to many of the returned astronauts they also had to deal with the fantasies of faceless millions at their backs for this was the first truly global media event The walkers would forever be caught between the gravitational pull of the moon and the earth's collective dreaming First Man James R. Hansen, 2012-11-27 On July 20 1969 the world stood still to watch American astronaut Neil A Armstrong become the first person ever to step on the surface of another heavenly body Upon his return to Earth Armstrong was celebrated for his monumental achievement He was also as NASA historian Hansen reveals in this authorized biography misunderstood Armstrong's accomplishments as an engineer a test pilot and an astronaut have long been a matter of record but Hansen's access to private documents and unpublished sources and his interviews with more than 125 subjects including more than fifty hours with Armstrong himself yield the first in depth analysis of this elusive reluctant hero An Abridged History of the United States Volume III Bob Navarro,

Reaching for the Moon Roger D Launius, 2019-06-25 Fifty years after the Moon landing a new history of the space race explores the lives of both Soviet and American engineers At the dawn of the space age technological breakthroughs in Earth orbit flight were both breathtaking feats of ingenuity and disturbances to a delicate global balance of power In this short book aerospace historian Roger D Launius concisely and engagingly explores the driving force of this era the race to the Moon Beginning with the launch of Sputnik 1 in October 1957 and closing with the end of the Apollo program in 1972 Launius examines how early space exploration blurred the lines between military and civilian activities and how key actions led to space firsts as well as crushing failures Launius places American and Soviet programs on equal footing following American aerospace engineers Wernher von Braun and Robert Gilruth their Soviet counterparts Sergei Korolev and Valentin Glushko and astronaut Buzz Aldrin and cosmonaut Alexei Leonov to highlight key actions that led to various successes failures and ultimately the American Moon landing **Marketing the Moon** David Meerman Scott, Richard Jurek, 2014-02-28 One of the most successful public relations campaigns in history featuring heroic astronauts press savvy rocket scientists enthusiastic reporters deep pocketed defense contractors and Tang In July 1969 ninety four percent of American televisions were tuned to coverage of Apollo 11's mission to the moon How did space exploration once the purview of rocket scientists reach a larger audience than *My Three Sons* Why did a government program whose standard operating procedure had been secrecy turn its greatest achievement into a communal experience In *Marketing the Moon* David Meerman Scott and Richard Jurek tell the story of one of the most successful marketing and public relations campaigns in history the selling of the Apollo program Primed by science fiction magazine articles and appearances by Wernher von Braun on the Tomorrowland segments of the Disneyland prime time television show Americans were a receptive audience for NASA

s pioneering brand journalism Scott and Jurek describe sophisticated efforts by NASA and its many contractors to market the facts about space travel through press releases bylined articles lavishly detailed background materials and fully produced radio and television features rather than push an agenda American astronauts who signed exclusive agreements with Life magazine became the heroic and patriotic faces of the program And there was some judicious product placement Hasselblad was the first camera on the moon Sony cassette recorders and supplies of Tang were on board the capsule and astronauts were equipped with the Exer Genie personal exerciser Everyone wanted a place on the bandwagon Generously illustrated with vintage photographs artwork and advertisements many never published before Marketing the Moon shows that when Neil Armstrong took that giant leap for mankind it was a triumph not just for American engineering and rocketry but for American marketing and public relations
