Smartphone-Based Human Activity Recognition Jorge Luis Reyes Ortiz, 2015-01-14 The book reports on the author's original work to address the use of today's state of the art smartphones for human physical activity recognition By exploiting the sensing computing and communication capabilities currently available in these devices the author developed a novel smartphone based activity recognition system which takes into consideration all aspects of online human activity recognition from experimental data collection to machine learning algorithms and hardware implementation The book also discusses and describes solutions to some of the challenges that arose during the development of this approach such as real time operation high accuracy low battery consumption and unobtrusiveness It clearly shows that it is possible to perform real time recognition of activities with high accuracy using current smartphone technologies As well as a detailed description of the methods this book also provides readers with a comprehensive review of the fundamental concepts in human activity recognition It also gives an accurate analysis of the most influential works in the field and discusses them in detail This thesis was supervised by both the Universitat Politècnica de Catalunya primary institution and University of Genoa secondary institution as part of the Erasmus Mundus Joint Doctorate in Interactive and Cognitive Environments

iOS Forensic Analysis Sean Morrissey, Tony Campbell, 2011-09-22 iOS Forensic Analysis provides an in depth look at investigative processes for the iPhone iPod Touch and iPad devices The methods and procedures outlined in the book can be taken into any courtroom With never before published iOS information and data sets that are new and evolving this book gives the examiner and investigator the knowledge to complete a full device examination that will be credible and accepted in the forensic community

Taiwan's Semiconductor Miracle Tain-Jy Chen, Chin-Tay Shih, 2025-11-18 This book examines how a series of inconceivable developments in the semiconductor industry over the last 40 years shaped modern Taiwan Covering one of the most dramatic episodes in modern technology history this book outlines the ascent of a resource impoverished and technology disadvantaged country to a leading position in the world's most complex industry which requires immense resources and technologies to succeed The book focuses on three major factors that contributed to this success the adoption of the foundry model the formation of human resources and the role of the state The role of geopolitics in Taiwan's success is

also assessed including how the US Japan Trade Arrangement has contributed to the decline of Japan's semiconductor industry the emergence of Chinese competitors and the resulting containment policies of the likes of Japan the US and Europe in favor of domestic production in recent years Illustrating the importance of strategy and human dedication and the roles of the state and international politics this book will be a valuable resource to students and scholars of Taiwanese politics history and business
